ANIMAL CARE
FIRST CYCLE DEGREE - ENGLISH LANGUAGE
Starting from the academic year 2017/2018, the University of Padua plans to introduce a new Bachelor degree program taught in English language titled “Animal Care”.

The course aims at providing knowledge, skills and competences to develop qualified human resources, specialised in animal care, husbandry and welfare, able to operate in different contexts.

The learning pathway includes:

- Basic disciplines: mathematics, physics, chemistry, biochemistry and biology;
- Animal science: animal nutrition and feeding, animal breeding and genetics;
- Veterinary science: veterinary anatomy, physiology, pathology, epidemiology of infectious and parasitic diseases, national and EU health legislations, ethology and animal welfare, principles of veterinary pharmacology, toxicology and anaesthesiology.

This degree focuses primarily on the practical skills used in animal care. The specific learning objectives meet the requirements of professionals who can be then employed in companies, private and public organisations in which the management, health, welfare and preservation of animals is achieved in accordance with a modern and international approach.

The Bachelor in Animal Care lasts 3 years and is delivered on our campus in Agripolis, Legnaro, Padova (Italy).

To be approved by the Ministry of Education, University and Research Check www.unipd.it/en/animal-care
