ARTICLE 1 MASTER COURSES OPENED

Public selections are called for the admission to first and second level Master courses which have been opened for the 2013/2014 academic year with duration of one year or two years, whose main features are set out in the annexed guidance sheets.

The Master course earns 60 university education credit points (*crediti formativi universitari – CFU*).

The Master courses for the 2013/2014 academic year are the following:

Area 02 - Physical sciences

1 - Science Communication

2 - Surface treatments for industrial applications - Trattamenti di superficie per l'industria

Area 06 - Biological sciences

3 - People nutrition and food education - NUTRICEA

Area 07 - Medical sciences

4 - System Administrator for imaging and Radiotherapy

5 - Health Assistance to ostomates and incontinent patients

6 - Aesthetic Plastic Surgery

7 - Cytology

8 - Management for Health professions

9 - Diagnosis and surgical treatment of congenital heart diseases in the paediatric age and in adults 1: for medical staff; 2: for nursing and perfusion staff;
3: for biomedical engineering staff

10 - Basic and advanced Echocardiography

11 - Basic and advanced Electrophysiology

12 - Diagnostic and therapeutic oncological endoscopy

13 - Hepatology: diseases of liver and biliary tract

14 - Hospital Based: HTA, PDTA, clinical pathways and medical devices

15 - The nurse as a case manager

16 - Perinatal medicine and neonatal intensive care

17 - Vascular Medicine

18 - Cardiovascular Pathology

19 - Paediatrics and its sub-specialty areas: 1: Cardiology; 2: Gastroenterology;

3: Clinical neurology and neurophysiology; 4: Rheumatology;

5: Oncohaematology; 6: Pneumology and Allergology;

7: Inherited metabolic diseases; 8: Nephrology

20 - Sedation and emergency in dentistry

21 - Mechanical circulatory support of cardiac function: technological innovation, care pathway and hub and spoke model

22 - Advanced techniques of mini-invasive pelvic surgery

23 - Pain therapy and paediatrics palliative care

24 - Manual therapy and muscular-skeletal rehabilitation

Area 08 - Agricultural and Veterinary Sciences

25 - International Veterinary Cooperation

26 - Food quality and safety

Area 10 - Industrial engineering

27 - Strategic Environmental Management - SEM

28 - Project and innovation management

Area 12 - Philological-literary Sciences, Antiquities and Arts

29 - Planning and management of tourism product

Area 13 - History, Philosophy and Pedagogical Sciences

30 - Disability and inclusive education in institutions and environment

31 - Illustration for childhood and aesthetic education.

For a pedagogy of iconic reading

32 - Pedagogy of the library services

33 - Latin American history, civilizations and literatures. Means of interaction in global dynamics

34 - Intercultural studies. 1: Social and cultural mediation; 2: Organization of events and intercultural activities

35 - Theory of argumentation and strategic communication practice in crisis, conflicts and emergencies

36 - Human resource evaluation, training, and development. Organizational analysis and interventions, risk prevention

Area 15 - Economics and Statistical Sciences

37 - International Commerce - MASCI

38 - Wealth management

39 - International business for small and medium enterprises

Area 16 - Political and social sciences

40 - Critical criminology and social security. Deviance, city and prevention policies

41 - European integration: EU policies and project management

Area 17 - Psychological sciences

42 - Death studies & the end of life for the intervention of support and assistance

43 - Didactics and psychopedagogy for Learning Disabilities

44 - Mindfulness and non-conventional practice in Clinical psychology and Health psychology

45 - Clinical Neuropsychology

46 - Psychodiagnosis and Intervention in developmental and adult age

47 - Psychology of Aging

48 - Sport Psychology

49 - Psychopathology of Learning Disabilities

50 - Forensic Psychopathology and Neuropsychology

ARTICLE 2 ADMISSION REQUIREMENTS AND INCOMPATIBILITY

2.1 Qualifications for access to the course: for access to the course applicants must hold at least a three year university degree (old-style degree, university diploma, degree, specialist/master degree if the course is a 1st level Master or old-style degree, specialist/master degree if the course is a 2nd level Master).

The entry qualifications required are set out in detail in the guidance sheets. Other university qualifications of an equivalent level, but other than those specified in the annexed guidance sheets, may be taken into consideration by the Admissions Board, in conjunction with a CV that demonstrates a satisfactory educational background and that is consistent with the Master course. Also, those who obtain the qualification required for admission within and not beyond the date on which the Master course begins may enter the selection process. Self-certification that the qualification has been obtained must reach the *Servizio Formazione Post Lauream* (Postgraduate Education Office) before the Master course starts.

2.2 Incompatibility: simultaneous enrollment in old-style degree courses, degree courses, specialist/master degree courses, specialization schools, research doctorates/doctorate schools, master courses and *TFA (Tirocinio Formativo Attivo* teacher training courses), and PAS (Special Enabling Courses), training courses for special needs teachers or finishing courses for the teaching of a non-linguistic discipline in a foreign language.

For the simultaneous enrollment in more courses, please see the incompatibility rules laid down on the “Regolamento didattico” (University regulations) and by the Governing Council of the University of 6 May and 3 June 2013 available on <http://www.unipd.it/come-iscriversi-ai-master?target=Laureati> website.

ARTICLE 3 PRE-ENROLLMENT APPLICATIONS

Applications for the Master course must be compiled **within 12.30 on the expiry date specified in the guidance sheet** by connecting to the website <https://uniweb.unipd.it/> website.

After the expiry date the connection will be terminated and it will no longer be possible to compile the application form.

Instructions for compilation:

Phase 1

1) Before filling in the application, log into the system following the instructions on the Uniweb homepage.

a) Click on “Registrazione” (Sign in) (if you have never been enrolled in the University of Padua) or

b) Click on “Gestione username e password” (Manage username and password) (if you do not remember them or if they are expired).

In case of difficulty with the username and password, you are advised to use the *Modulo Uniweb Post Lauream – username/password* which you will find in the <http://www.unipd.it/modulistica-0> website under “Modulistica Master”.

2) After logging in with your credentials (if your career is displayed, select to continue), click on *Didattica* and select *Preimmatricolazione ad accesso programmato*.

3) Click low down on *Preimmatricolazione corsi ad accesso programmato* and select the type of course, *Master di primo livello* or *Master di secondo livello*.

4) Select the course.

5) Fill in the application form.

6) Print the application by clicking on “Print pre-enrollment overview” (the form for the payment of 31.00 euro as pre-enrollment fee will be printed with it).

The 31.00 euro enrollment fee (including 16.00 euro virtually paid stamp duty) is non-refundable, regardless of the outcome of the selection process or of whether the Master course is started or not. The fee indicated on the payment slip may be paid in one of the following ways:

- At Cassa di Risparmio del Veneto SpA - Gruppo Intesa Sanpaolo branches (this is the University's bank), and other banks on Italian soil;

- Through the Home Banking service for customers of Cassa di Risparmio del Veneto SpA - Gruppo Intesa Sanpaolo, Gruppo Intesa Sanpaolo banks and through other credit institutions where this service operates;

- At all ATM machines of Cassa di Risparmio del Veneto SpA - Gruppo Intesa Sanpaolo banks, with a cashcard issued by any credit institution and at the ATM machines of other banks that provide a similar service (to pay through an ATM, the MAV identification code shown on the payment slip must be entered);

- Through the Home Banking service and ATM machines for Superflash prepayment card holders (to pay through an ATM, the MAV identification code shown on the payment slip must also be entered in this case).

In case of difficulty arising in compiling the application form, a telephone helpdesk will be operational on 049 8276373/8276374 from 10.00 to 12.30 from Monday to Friday.

There will be a computer workstation available at the *Servizio Formazione Post Lauream*, Via Ugo Bassi 1, 35131 Padova, for those who require it. It will be open Monday to Friday from 10.00 to 12.30; on Tuesdays it will also be open from 15.00 to 16.30 and on Thursdays it will be open continuously from 10.00 to 15.00.

The *Servizio Formazione Post Lauream* office will be closed from 23 to 31 December 2013 and in conjunction with other public holidays.

Phase 2

The pre-enrollment application, signed in the original, must reach the office specified in the annexed guidance sheets (by post or hand delivered) within and not beyond 13.00 on the expiry date specified in the guidance sheet. See the annexed guidance sheet for the hours for the reception of the application. The post office stamp will not be considered valid as proof of compliance with the expiry dates specified in the guidance sheet.

Applications may also be sent by certified e-mail (*PEC – posta elettronica certificata*) within and not beyond 13.00 on the expiry date specified in the guidance sheet, to the certified e-mail address given in said guidance sheet, according to the following methods:

- With a digital signature appended on it and on all the documents that require an autograph signature in traditional form;
- By sending a copy of the application with an autograph signature together with the signatory's identity document; similarly, signed copies of all the documents that require an autograph signature in traditional form must be transmitted. The copies of these documents may be scanned;
- By means of the candidate's personal certified e-mail for messages from and to the authorities (*CEC-PAC – comunicazione elettronica certificata tra pubblica amministrazione e cittadino*) together with the required documents.

To send documents on screen, static formats that are not directly editable must be used, without macroinstructions or executable codes and preferably in pdf.

Finally, it is not necessary to call the University offices to inquire whether the application has arrived, nor is it necessary to send any hard copy message because the acknowledgement is sent automatically by the certified e-mail operator.

Failure to comply with the time limit specified for the presentation of the pre-enrollment application, whether sent online or in hard copy, entails exclusion from the selection procedure.

The following must be sent with the application:

- 1) CV;
- 2) Any documents required for admission to the Master course;
- 3) A photocopy of the receipt for the payment of the 31.00 euro pre-enrollment fee;
- 4) A photocopy of a valid personal identity document;
- 5) A photocopy of a valid passport if the applicant is a non-EU citizen.

When enrolling in more than one Master course, the application form must be sent with the above-mentioned documents and the 31.00 Euro enrollment fee.

Applications must contain a declaration in lieu of the certification of the educational qualification required for admission to the Master course. The University of Padua reserves the right to make the appropriate inquiries to the institution that granted the qualification.

Documents, if any, may be produced in the original or in a copy that is declared to be a true copy of the original (Modulo dichiarazione sostitutiva autocertificazione titolo, available in the website <http://www.unipd.it/modulistica-0>).

Pursuant to Article 40 of Presidential Decree 445/2000, as amended by Article 15 of Law 183/2011, in dealing with public authority offices and operators of public services, certificates and self-declared certificates are always replaced by the declarations referred to in Articles 46 and 47 of the Decree.

Citizens of non-EU States, duly authorized to stay in Italy, may only use the declarations referred to in Articles 46 and 47 of Presidential Decree 445/2000 for status, personal qualities and circumstances that can be certified or attested by Italian public bodies (see Article 3, paragraphs 2, 3 and 4, of Presidential Decree 445/2000).

The University Administration declines all responsibility for any communications that go astray resulting from incorrectly stated addresses, places of residence or contact addresses by the applicant, delay in changing such particulars or resulting from any postal, screen-based technology or telegraphic problems for which the University Administration is not to blame.

Within six months after the conclusion of the competition and 120 days after the publication of the admission list, candidates must take steps to recover any publications (if submitted in the original) from the office to which they have been sent. After this time limit has expired, the University Administration will not be answerable for the preservation of these documents.

Dyslexic candidates, pursuant to Law 170 of 8 October 2010, and disabled candidates, pursuant to Law 104 of 5 February 1992 and Law 17 of 28 January 1999, may ask to use aids and/or to be given personalized tests in order to take the admission tests, according to their disabilities. Requests of this kind must be specified during the compilation of the pre-enrollment application in Uniweb; in order to confirm the request, the form has to be printed and delivered to the Servizio Disabilità dell'Università degli Studi di Padova at Via Portello, 23, Padova.

Candidates that hold an educational qualification obtained abroad should refer to the instructions in Article 6, below, of this Selection Notice.

ARTICLE 4 SELECTION PROCEDURE

The selection procedure will be conducted following the procedures and in conformity with the time limits stated in the annexed guidance sheet.

Should there be cases of applicants with equal merits, the Board will adopt the preferential requirement criterion specified in the guidance sheet.

The Master Course Regulatory Board (Comitato Ordinatore) reserves the right to arrange for pre-selection aptitude tests should there be a substantially higher number of applications for admission than the maximum number of places available.

ARTICLE 5 SELECTION RESULTS, ENROLLMENT OF THE WINNERS, REPLACEMENTS

5.1 Publication of the list. The list will be available to the public from the expiry date specified in the guidance sheet in the following ways:

- Affixed to the notice board of the Servizio Formazione Post Lauream, Via Ugo Bassi 1, 35131 Padova;
- Published in the Padua University website: <http://www.unipd.it/master>.

The publication of the list is valid as an official notification to those concerned.

Two selection procedures are applied to some Master courses: one for EU citizens and one for non-EU citizens (please see each single sheet for more information).

Two lists will therefore be published: the most suited in the two lists could be offset against each other until the maximum number of available places is filled.

5.2 Enrollment of EU and non-EU candidates with qualifications obtained in Italy. In order to complete their enrollment, candidates must hand in the documents listed below, within and not beyond the date specified in the Master course guidance sheet, to the Servizio Formazione Post Lauream office at Via Ugo Bassi 1, 35131 Padova (office hours Monday to Friday from 10.00 to 12.30; Tuesdays also from 15.00 to 16.30 and Thursdays continuously from 10.00 to 15.00), or send them to: Università degli Studi di Padova, Servizio Formazione Post Lauream, Via VIII febbraio 1848, 2, 35122 Padova:

- A photocopy of the receipt for the payment of the enrollment fee, to be made by bank transfer (using Annex A) to Università degli Studi di Padova, IBAN code IT81V0622512186100000300875, Cassa di Risparmio del Veneto SpA - Gruppo Intesa Sanpaolo - Ufficio di Tesoreria. The various Master course guidance sheets should be referred to for the amount to be paid. The enrollment fee includes the premium for accident insurance, third party liability and stamp duty at the current rate. Transfers sent by home banking will only be considered valid for enrollment if the Servizio Formazione Post Lauream receives the receipt for the bank transfer complete with CRO, TRN or CRI transfer code;

- A passport-size photo bearing the name of the person who is to attend the course on the reverse in block letters with the name of the Master course for which he or she is enrolling;

- A self-certification of gross annual income (for the Master calendar year 2014) to participate in the awarding of scholarships only for some Master courses. The "Autocertificazione del reddito" form is available on <http://www.unipd.it/modulistica-0> website.

- Female candidates only: a declaration to the effect that the person concerned has read the Regolamento per la frequenza dei laboratori da parte delle studentesse in stato di gravidanza ("Regulations for expectant mother students attending laboratory sessions"), in Annex B.

Copies of bank transfer receipts may also be sent by fax to 049 8276386. The candidate, however, must in any case see that he or she lets the Servizio Formazione Post Lauream have the remaining documents necessary in order to complete enrollment.

Those who have not completed their enrollment within the required date will be considered to have given up their application.

Candidates that hold an educational qualification obtained abroad should refer to the instructions in Article 6, below, of this Selection Notice.

5.3 Replacements. Any places that become available after express or tacit waiver or the loss of the right to enrollment, will be allocated to the persons in the following places on the admissions list in order of ranking.

For this purpose, those entitled to a place in the list will be contacted orally by the Servizio Formazione Post Lauream office, which will give them all the information required regarding the formalities for completing their enrollment within the date specified in the guidance sheet. Should other places remain, this office will continue contacting applicants until all the free places have been taken.

ARTICLE 6 EDUCATIONAL QUALIFICATIONS OBTAINED ABROAD AND REGULATIONS FOR FOREIGN CITIZENS

Italian and foreign citizens holding an educational qualification from a University abroad may submit an application for selection for admission to the 2013/2014 academic year Master course; their qualification must be equivalent to one of the degrees required for entry to the chosen course in accordance with international agreements and conventions. The holders of other qualifications obtained abroad must apply to have their qualification recognized as equivalent. The Master Course Regulatory Board (Comitato Ordinatore del Master) will decide whether to recognize such

qualifications solely for the purposes of entry to the course. Enrollment is subject to the academic recognition of the qualification and passing the selection procedure.

6.1 Pre-enrollment of candidates that hold educational qualifications obtained abroad.

Applicants holding an educational qualification obtained abroad must arrange for the pre-enrollment form to reach the Servizio Formativo Post Lauream within the time limits specified in the various guidance sheets. Applications may be hand delivered to the Servizio Formativo Post Lauream office at Via Ugo Bassi 1, 35131 Padova (office hours Monday to Friday from 10.00 to 12.30; Tuesdays also from 15.00 to 16.30 and Thursdays continuously from 10.00 to 15.00), or sent by post to: Università degli Studi di Padova, Servizio Formazione Post Lauream, Via VIII febbraio 1848, 2, 35122 Padova.

The following must be sent with the application:

- 1) CV;
- 2) Any qualifications and documents required for admission to the Master course;
- 3) A copy of the degree diploma with declaration of value if available;
- 4) A certificate stating examinations taken and marks obtained;
- 5) All other documents deemed helpful for the evaluation of the admissibility of the qualification held (diploma supplement, European format CV, etc.);
- 6) Translation of the documents into Italian or English (if not already drawn up in a widely diffused language);
- 7) A photocopy of the receipt for the payment of the 31.00 euro pre-enrollment fee;
- 8) A photocopy of a valid personal identity document;
- 9) A photocopy of a valid passport if the applicant is a non-EU citizen.

Applications may also be sent by certified e-mail (PEC – posta elettronica certificata) within the time limit specified in the guidance sheet to unipd.ammcle@legalmail.it, according to the following methods:

- With a digital signature appended on it and on all the documents that require an autograph signature in traditional form;
- By sending a copy of the application with an autograph signature together with the signatory's identity document; similarly, signed copies of all the documents that require an autograph signature in traditional form must be transmitted. The copies of these documents may be scanned;
- By means of the candidate's certified personal certified e-mail for messages from and to the authorities (CEC-PAC – comunicazione elettronica certificata tra pubblica amministrazione e cittadino) together with the required documents.

To send documents on screen, static formats that are not directly editable must be used, without macroinstructions or executable codes and preferably in pdf.

Finally, it is not necessary to call the University offices to inquire whether the application has arrived, nor is it necessary to send any hard copy message, because the acknowledgement is sent automatically by the certified e-mail operator.

Failure to comply with the time limit specified for the presentation of the pre-enrollment application, whether sent online or in hard copy, entails exclusion from the selection procedure.

6.2 Enrollment for winning applicants holding educational qualifications obtained abroad.

Candidates who have won places for the Master course must hand in the documents listed below, within and not beyond the date specified in the Master course guidance sheet, to the Servizio Formazione Post Lauream office at Via Ugo Bassi 1, 35131 Padova (office hours Monday to Friday from 10.00 to 12.30; Tuesdays also from 15.00 to 16.30 and Thursdays continuously from 10.00 to 15.00), or send them to Università degli Studi di Padova, Servizio Formazione Post Lauream, Via VIII febbraio 1848, 2, 35122 Padova:

- Educational qualification (if obtained in a non-EU country, accompanied by an official translation, legalised and with a declaration of value issued by the Italian representational office competent for the area concerned;
 - A photocopy of the receipt for the payment of the enrollment fee, to be made by bank transfer (using Annex A) to Università degli Studi di Padova, IBAN code IT81V0622512186100000300875, Cassa di Risparmio del Veneto SpA - Gruppo Intesa Sanpaolo - Ufficio di Tesoreria. The various Master course guidance sheets should be referred to for the amount to be paid. The enrollment fee includes the premium for accident insurance, third party liability and stamp duty at the current rate. Transfers sent by home banking will only be considered valid for enrollment if the Servizio Formazione Post Lauream is sent the receipt for the bank transfer complete with CRO, TRN or CRI transfer code;
 - A passport-size photo bearing the name of the person who is to attend the course on the reverse in block letters with the name of the Master course for which he or she is enrolling;
 - Female candidates only: a declaration to the effect that the person concerned has read the Regolamento per la frequenza dei laboratori da parte delle studentesse in stato di gravidanza" ("Regulations for expectant mother students attending laboratory sessions"), in Annex B);
 - Stay permit issued by the police headquarters competent for the area for non-EU students who intend to stay in Italy for a consecutive period of more than 90 days in one half year. Those who have to apply for a stay permit are advised to make an appointment with the S.A.O.S. service (Sportello Accoglienza Ospiti Stranieri, (Foreign Visitor Reception) Palazzo Bo, Via VIII Febbraio 1848, 2, Padova, tel 0498273077, fax 049 8273060, e-mail saos@unipd.it., office hours Tuesday and Thursday 15.00 to 16.30) for detailed information regarding the documents required by the police;
 - A self-certification of gross annual income (for the Master calendar year 2014) to participate in the awarding of study prizes only for some Master courses. The "Autocertificazione del reddito" form is available on <http://www.unipd.it/modulistica-0> website under "Modulistica Master".
- Copies of bank transfer receipts may also be sent by fax to 049 8276386. The candidate, however, must in any case see that he or she lets the Servizio Formazione Post Lauream have the remaining documents necessary in order to complete enrollment.
- Those who have not completed their enrollment within the required date will be considered to have given up their application.
- It is suggested that foreign students that are not citizens of EU countries consult the contents of Ministry memorandum 602 of 18 May 2011, available on website <http://www.studiare-in-italia.it/studentistranieri/>, and, specifically, <http://www.studiare-in-italia.it/studentistranieri/5.html>. with regard to the documents necessary for enrollment and obtaining a stay permit.

ARTICLE 7 ATTENDANCE AND FINAL CERTIFICATE

7.1 Attendance. Students must attend at least 70% of the sessions, unless differently specified in each single guidance sheet.

Students that give up attending, fail to attend sessions, are absent from more than 30% of the course or are removed from the course for any reason will be excluded from the Master course (unless differently specified in each single guidance sheet)

Students that do not obtain a pass grade in the final assessment may repeat the final test once only, in accordance with the procedures laid down by the Master Course Regulatory Board.

Except in cases provided by law, the work that has already been done by a student, who no longer takes part in the educational activities in the Master course, will not be recognized.

7.2 Abandonment. Students may ask to abandon the course at any time: this is irrevocable and must be expressed clearly and explicitly in writing: the Modulo rinuncia agli studi (Abandonment of course form) is to be found in the website <http://www.unipd.it/modulistica-0> under "Modulistica Master".

Students who state that they are abandoning the course after 30 June 2014 (if it is a one-year Master) and after 24 November 2014 (if it is a two-year Master) must in any case pay the second installment.

7.3 End-of-course certificate. At the end of the course a first or second level University Master certificate will be issued. It is obtained subject to the acquisition of the credit points specified in the notice of selection, including those for the final assessment of progress test. In order to gain access to the final test, students must in any case pay the enrollment fees.

ARTICLE 8 SINGLE COURSES

Certain lessons are proposed as single courses. For greater details refer to the selection notice "Corsi singoli nei Master a.a. 2013/2014", available in the website <http://www.unipd.it/master>.

ARTICLE 9 PROCEDURE MANAGERS

In accordance with Article 4 of Law 241 of 7 August 1990 containing new rules of administrative procedures and the right of access to administrative documents, as subsequently amended, the General Manager has appointed one Administrative Procedure Manager for the selection process for each Master course.

Candidates may exercise the right of access to the selection process documents as laid down in Presidential Decree 184 of 12 April 2006 containing regulations in the matter of access to administrative documents in conformity to Chapter V of Law 241/1990. Dr Maria Zanato of the Servizio Formazione Post Lauream office has been appointed as Procedure Manager for the procedure involved in access to these documents.

ARTICLE 10 SPECIAL CIRCUMSTANCES

10.1 Activation of the Master course. If the minimum number of students specified in the guidance sheet have not enrolled and paid the enrollment fee in full, the Master course cannot be held. In this case the enrollment fee will be refunded.

The start of each course depends on a prior convention set up with a third-party; the same applies to those Master courses relying on out-tasking services.

10.2 Recognition of previous credit points: Pursuant to law n. 240 of 30th December 2010, and article 2 of the Regulation of Master courses of the University of Padua and in order to complete the Master course, the Master Organization Committee can acknowledge any training and specialization courses prior to the Master, as long as it is consistent with the characteristics of the Master and is suitably certified, to complete the Master course. Each single sheet specifies the training and specialization course that can be acknowledged and their corresponding credit points.

ARTICLE 11 CONCESSIONS

11.1 Reductions. A fixed fee of 424.50 euro has been arranged for disabled candidates with a recognized invalidity rating of 66% or more.

If the disabled candidate is enrolled in a two-year Master course, he/she will have to pay a "Worker's Compensation and Third party liability insurance" premium of 8.50 euro for the second year as well.

Disabled candidates are asked to contact the Master course secretariat with regard to both classroom and work placement courses.

11.2 Reductions for DAC List: for all DAC List candidates, that is non-EU citizens (non-citizens and non-residents) coming from developing countries (as part of the DAC List of ODA recipients Effective

<http://www.oecd.org/dac/stats/DAC%20List%20used%20for%202012%20and%202013%20flows.pdf>) may be entitled to a reduction in the enrollment fee, as indicated in each single sheet.

They could also be entitled to other types of partial reductions of the enrollment fee, as indicated in each single Master sheet with their corresponding awarding criteria.

If more candidates are entitled to the same reduction, the successful candidate will be chosen according to a merit classification. In the case of further parity, the final decision will be based on drawing lots.

11.3 Study prizes. At the end of the course, students may be awarded study prizes in accordance with the criteria laid down in the guidance sheet.

11.4 Scholarships: Students may be awarded scholarships for some Master courses. Each single sheet shows whether any scholarships are foreseen, including their number and amount. The allocation of these grants will be made according to a merit classification and the gross personal income of the student (less than 10,000.00 euro in relation to the solar year of attendance at the course, or if a Master 2014 annual duration, in relation to each calendar year if it's a two-year Master). The student will:

- Undertake to return the scholarship received, if the income limit is exceeded;
- Undertake not to combine the Master scholarship with other scholarships awarded for whatever reason, except those awarded by national or foreign institutions which integrate the activities of the course with stays abroad.

For any self-certifications please use the "Modello per autocertificazione reddito" (self-certification for income form), at <http://www.unipd.it/modulistica-0>, under "Modulistica Master". Failure to submit the self-certification at the time of enrollment irrevocably excludes the candidate from participating in the awarding of grants, if any.

The award of the scholarship, which will be paid in two installments, does not exempt the student from the payment of the registration fee and will resolutely depend on the effective completing the master. The provision of scholarships funded by external organizations is subject to the successful conclusion of the Agreement between the University and the body in question.

The amount of the scholarship is intended to be gross and inclusive of expenses in charge of the organization.

In addition to the scholarships listed in each single sheet, others may be provided by public or private funding.

11.5 Accumulation of concessions. Students enrolled for a Master course may not benefit from more than one concession in the same academic year.

ARTICLE 12 NOTES AND WARNINGS

12.1 Any changes or additions to the contents of this selection notice will be made known as follows:

- By putting a notice on the official University Notice Board;
- By putting a notice on the Servizio Formazione Post Lauream notice board;
- By publication in the University of Padua website: <http://www.unipd.it/master>.

12.2 All candidates are admitted to the selection procedure and allowed to attend the Master course subject to reservation. At any time the University Administration may order, providing the reasons for its decision, exclusion from the course owing to the absence of the prescribed requirements. The order will be notified to the person concerned by recorded delivery with acknowledgement of receipt.

12.3 If it is found in the documents produced that an applicant has made false statements, given untrue information or used false documents – without prejudice to the penalties envisaged in the Criminal Code and the special laws in the matter (Articles 75 and 76 of Presidential Decree 445/2000), he or she will be automatically excluded from the Master course and will lose any benefits that have been obtained. Such false statements will expose the persons concerned to actions for damages on the part of other interested parties and their enrollment fee will not be refunded.

12.4 Enrollment fee and refunds. An enrollment fee is payable for the Master course, divided into two installments. As the Master course lasts one year, the second installment must be paid within 31 July 2014. As far as the two-year Master course is concerned, the second installment must be paid within 22 December 2014. Failure to comply with these deadlines will imply a default payment of 21.00 euro for the first 15 days, and 53.00 euro from the 16th day onwards.

To print the payment slip for the course, students must connect to the website <https://uniweb.unipd.it/> and follow this procedure:

- 1) Log into the system with the username and password;
- 2) Select the Master course for which they have enrolled;
- 3) Select item Diritto allo studio e corsi estivi in the menu on the left;
- 4) Select item Tasse in the pull-down menu;
- 5) In the Pagamento non pervenuto schedule, find the invoice for the second installment, select it and print the pre-compiled payment slip;
- 6) Proceed with payment.

Enrollment fees are non-refundable except in the event provided for in Article 10.1.

Exceptionally, the Chancellor, having consulted the Director of the Master course, may accept applications for the partial refund of the enrollment fee, justified by unforeseen, documented causes of force majeure that make attendance impossible. In such cases, the refund may not, in any event, exceed 60% of the fee that has been paid.

Applications for refunds cannot be accepted with effect from thirty days after the educational activities in the Master course have begun.

12.5 Data protection. Pursuant to the provisions of Legislative Decree 196 of 30 June 2003, the Italian Data Protection Code, concerning the protection of persons and other entities' personal data, and, in particular, the provisions of Article 13 thereof, the personal data provided by the candidates will be collected by Padua University in order to manage the selection process and will also be computerized. The personal data of those admitted to the Master course will also continue to be processed after their registration for the purposes related to the management of their university career. It is compulsory to provide these data in order for applicants' entry requirements to be assessed, on pain of exclusion from the selection process. Any refusal to provide such data involves the inability to provide the service, and to provide the performance required.

The information provided may only be transmitted to the public administrations directly involved in the candidates' university position and in the conduct of the selection process.

The data will be processed manually, by paper or by computer. For those admitted to the Master, the data processing will continue after enrollment for the purposes related to the management of the academic career, for communications related to administrative, educational offers by the University, organization of teaching, statistical analyses and investigations within the University in order to improve the services and assistance to students or to improve teaching. Providing such data is essential to assess the criteria for participation, on pain of exclusion from the selection procedure. Any refusal to provide such data involves the inability to provide the service, and to provide the performance required. The information provided may be disclosed to the public administrations directly interested in the candidate's university position or in the selection process. The data will be spread through publication in the University website and public bulletin boards as required by law. The non-sensitive personal data may be disclosed with the consent of the person concerned to companies, agencies or organizations, requesting its possible inclusion in the labour market, or to organizations or companies who request them in order to provide scholarships or study prizes to deserving students. The non-sensitive personal data may be disclosed through paper directories and via WEB prior consent to its possible inclusion in the labour market. The consent for the communication and dissemination of personal data for the purposes and to the persons specified in the previous two points is optional. This consent may be revoked and will be acquired by the individual through the UNIWEB procedure (<https://uniweb.unipd.it/>) by following

the following links: *Didattica>Dati Personali*, on the *Recapiti e consensi* page. The processing of sensitive data will be carried out in accordance with the “Regolamento per il trattamento dei dati sensibili e giudiziari dell'Università “ (Regulations for the processing of sensitive and judicial data of the University), available at the following link: <http://www.unipd.it/universita/statuto-e-regolamenti/regolamenti/regolamenti-di-interesse-generale>. The candidates are entitled to the rights referred to in Articles 7, 8, 9 and 10 of the said Legislative Decree, among which the right to access to the data that concern them in addition to some additional rights including the right to rectify, update, complete or erase erroneous or incomplete data or data collected illegally and the right to object, for lawful reasons, to their being processed. These rights may be enforced against Università degli Studi di Padova, Via VIII Febbraio 1848, 2, Padova, which is the data controller.

ARTICLE 13 REFERENCE REGULATIONS

The Master course related to this notice is governed by University, Scientific Research and Technology Ministry Decree 270 of 22 October 2004, and in particular by Article 3, paragraphs 9 and 10, Article 5 and Article 7, paragraph 4, of the Padua University Regulations for University Master Courses and the Padua University Regulations for University Distance Master Courses. All matters for which specific provision is not made in this selection notice are governed by current law.

**NOTICE OF SELECTION FOR ADMISSION TO MASTERS ♦ UNIVERSITÀ DEGLI STUDI DI PADOVA
FOR THE 2013/2014 ACADEMIC YEAR**

	journalism, institutional and business communications, traditional and multimedia publishing, museology, scientific exhibition organization, promotion and management of scientific cultural and interdisciplinary initiatives, are the main fields of application together with the increasing importance given to digital communications in science.			
Employment openings	Students are prepared to enter the fields of scientific journalism using various media, including the new online methods, able to prepare and manage communications plans for research boards, public and private institutions and, in particular, health structures, scientific museums and science centres, for the school generally, and for communicating technological innovation in cutting edge enterprises.			
Organization	<p>Minimum rate of attendance required: 70%</p> <p>Schedule: teaching normally takes place all day Friday and Saturday mornings, from January to November</p> <p>Forms of teaching: lessons; internships; final test</p> <p>Assessment of progress: for each discipline</p> <p>Final test: written/oral</p> <p>Further information: visits to important ecological-natural environments, to exhibitions, museums, scientific laboratories, industrial plant. Attendance at conventions, cultural-scientific initiatives.</p> <p>The students are subject to a compulsory internship with companies or enterprises, for an individual commitment of 200 hours. Alternatively, project work is available in place of the internship for the same amount of hours with the university structures or enterprise.</p> <p>SINGLE COURSES</p> <p>Certain lessons are proposed as single courses. Language	English
Director	Vincenzo Palmieri “Galileo Galilei” Physics and Astronomy Department - DFA Nuclear Physics Institute - Legnaro National Laboratories 049 8068321 palmieri@lnl.infn.it
Objectives	<p>The Master mainly aims at preparing the necessary skills for appropriate use of new technology and diagnostics addressed to improving industrial processes. In particular, training super specialists who, once they have learned the most advanced plasma engineering technology, are able to simply apply it to, for example, production of dental implantology, surgical prosthetics and titanium heart valves, titanium components for ultra light vehicles, new technology for eyewear production and jewellery, design and construction of depositing sources. In detail, they will be trained for national industry and specialized research boards, being able to design, plan, construct, perfect and maintain depositing machines of fine PVD film and electrochemical plant.</p>
Employment openings	<p>The Master trains experts in the design, construction and automation of PVD depositing plant and electrochemical treatment. Student employment openings are as R&D Manager or Process Operator for private industry, researcher or technologist in public or private research.</p>

Organization	<p>Minimum rate of attendance required: 70%</p> <p>Schedule: teaching is both one to one and in the laboratory. Once the basic theoretic elements have been acquired from one to one teaching, the student has to constantly attend the laboratories. Practice using the modern instrumentation available in the laboratories teaches students to both design and to manage the typical industrial surface treatment plant. Lessons are generally divided: 50% in the morning and 50% in the afternoon. The laboratory includes internships and project work c/o the National Laboratories in Legnaro or laboratories that have arrangements with the Master course.</p> <p>Forms of teaching: lessons; seminars; internships; project work; final test</p> <p>Assessment of progress: for each discipline</p> <p>Final test: oral</p>

Director	<p>Maria Pia Rigobello</p> <p>Department of Biomedical Sciences - DSB</p> <p>049 8276138</p> <p>mariapia.rigobello@unipd.it</p>
Objectives	<p>The Master works in the field of social nutrition and informed diet, to provide employment openings in the areas of human nutrition, with special reference to problems related to community and collective catering, food controls and safety. The aim is to ensure the students acquire the correct instruments to enable implementing the guidelines and nutritional indications with a critical sense and with in-depth and up to date skills. The course also prepares profiles who, having acquired this knowledge and skills, are able to transfer them to the field of work, being proactive in the sector of food education in both public and private areas.</p>
Employment openings	<p>Students are able to apply the training and experience they have acquired through employment openings as advisors and operators in public and private structures that cater for communities. They could hold a role as an expert providing for specific needs, such as in sports communities, or focusing on prevention and health protection, such as in school or rest home canteens. Their work could be valuable for public boards (regional, provincial or council structures), such as the Local Health Service, working in food hygiene and food education) and for private enterprises.</p>
Organization	<p>Minimum rate of attendance required: 70%</p> <p>Schedule: one to one lessons are held all day Friday and Saturday morning, to reach a total of 336 hours, of which approximately 20% by means of computerised systems. The project work can be carried out preferably in public, but also private, structures.</p>

	<p>Forms of teaching: lessons; seminars; expert speakers; remote teaching; project work; final test</p> <p>Assessment of progress: for each discipline</p> <p>Final test: oral</p> <p>Further information: Project work is foreseen with the regional health service and other public and private entities. Articulated study visits throughout the course: during each visit, a teaching visit will be organised held by both the teaching staff and external experts.</p>
Venue	<p>Department of Biomedical Sciences - DSB</p> <p>Via Ugo Bassi, 58/b - 35131 Padova</p>
Starting date	<p>Lessons: 01/03/2014</p> <p>Internships/project work: May</p>

AREA 07 - MEDICAL SCIENCES

4 – System Administrator for imaging and Radiotherapy	
Reference area	07 - Medical sciences
Proposing department	Molecular Medicine Department - DMM
Level	1
Duration	One year
Credit points	60
Language	Italian
Director	Vincenzo Baldo Molecular Medicine Department - DMM 049 8275381 vincenzo.baldo@unipd.it
Objectives	Upon termination of the Master the student will be able to monitor errors and trace the process factors that generated them, addressed to continuous improvement to the technical and professional quality; optimise process methods and diagnostic data archiving on various systems; signal elements that are correlated to malfunctions or potential risks of error in the data acquisition, archiving and backup process; intervene to rapidly manage problems related to diagnostic data post processing and/or therapy malfunctions; analyse and identify the needs for training of the professional operators in the image diagnostics service, in relation to diagnostic, therapy and IT technology development and innovation; develop communications and relational skills to enable effective interaction with the stakeholders in the hospital information process.
Employment openings	The Medical Radiology Health Operator (TSRM) with a Master in “Radiotherapy Image System Administrator” is already active in both public and private structures, acting as controller of internal diagnostic image post processing processes. The skills provided by the Master enable the TSRM to candidate him/herself as “System Administrator”, as it links the professional skill in digital image production with IT skills in information process management that links the data, inputs them to the database and recalls them for the needs of diagnostics and care. In short, the Administrator is a Medical Radiology Health Operator, who is the person responsible for the contacts and controlling the quality of the processes that determine the diagnostics image, the provision of images for the clinic, archiving and backup of the images and correlated data.
Organization	Minimum rate of attendance required: 70% of the teaching hours provided by each discipline; a lower attendance rate in even just one

6 – Aesthetic Plastic Surgery	
Reference area	07 - Medical sciences
Proposing department	Neuroscience Department - NPSRR
Level	2
Duration	One year
Credit points	60
Languages	Italian / English
Director	Franco Bassetto

**NOTICE OF SELECTION FOR ADMISSION TO MASTERS ♦ UNIVERSITÀ DEGLI STUDI DI PADOVA
FOR THE 2013/2014 ACADEMIC YEAR**

	Neuroscience Department - NPSRR 049 8212633 franco.bassetto@unipd.it
Objectives	By means of direct surgery teaching (the student attends an average of at least 12 operations a week for a total of 80/100 operations in the year of the course) and the discussion of clinical cases, the Master aims at providing doctors, who dedicate themselves to this specific field, the fundamental principles and latest procedures proposed by internationally renowned Italian and foreign teachers. The objective is to acquire a vast and up to date cultural knowledge about the main surgical operations, and technical autonomy in conducting them.
Employment openings	There is an increasing demand for cosmetic improvement surgery, and it can be validly presumed it will double over the next ten years. A well trained professional will easily find work in any public (hospitals) and private (nursing homes and clinics) structures, where cosmetic surgery must be conducted with skill in total safety.
Organization	Minimum rate of attendance required: 75% Schedule: The Master course is over eight months with monthly cycles. Attendance is compulsory and each student must attend at least seven of the eight cycles, which include introductory classroom lessons and direct surgery lessons for a total of 55 hours a week. At the end of the course, the student must have attended preoperational analysis and surgical treatment of at least five different clinical cases. The evaluation of the student satisfaction is by means of an anonymous questionnaire. Forms of teaching: lessons; seminars; remote teaching; project work; final test Assessment of progress: global for all the disciplines Final test: oral Further information: the main feature of the Master is the use of direct surgery viewing for 60% of the total course hours; planning surgical operations and discussing the procedures directly with the patient.

9 – Diagnosis and surgical treatment of congenital heart diseases in the paediatric age and in adults 1: for medical staff; 2: for nursing and perfusion staff; 3: for biomedical engineering staff	
Reference areas	07 - Medical sciences
	06 - Biological sciences
Proposing department	Department of Cardiology, Thoracic and Vascular Studies
Level	1
Duration	One year
Credit points	60
Languages	Italian / English

Director	Giovanni Stellin Department of Cardiology, Thoracic and Vascular Studies 049 8212410 giovanni.stellin@unipd.it
Objectives	In depth knowledge of the surgery and management of congenital heart disorders in children and adults, and the basic anatomic and physiopathological knowledge of congenital heart diseases. In particular, the Master provides professional training into the anatomy and physiopathology of congenital heart diseases; correction of heart diseases in new-born children; new mini-invasive techniques and hybrid approaches; principles of cardio circulatory physiopathology and perfusion techniques; use of new bioengineering tissues and new methods and replacement heart and vascular valves for intra-cardiac surgery; field of mechanical circulation assistance in paediatric age; instrumental diagnosis and clinical management before, during and after surgery for congenital heart diseases in new-borns and adults; acquisition of knowledge about the importance of data collection and a database for clinical management and strategies to improve results.
Employment openings (Course 1)	<u>For medical staff:</u> provides technical and scientific training for medical professionals, such as paediatric heart surgeons, and also cardiologists, anaesthetists, paediatricians and neonatal doctors.
Employment openings (Course 2)	<u>For nursing and perfusionist staff:</u> provides technical and scientific training for medical professionals, such as nurses involved in treating patients with congenital heart diseases both before and after surgery, and paediatrician perfusion operators.
Employment openings (Course 3)	<u>For biomedical engineering staff:</u> provides technical and scientific training for medical professionals, such as biologists and bioengineers, assigned to the design of new biomedical devices and biomaterials.
Organization	<p>Minimum rate of attendance required: 70%</p> <p>Schedule: the Master involves one to one activities (lessons, seminars) and internships/project work, when the student has access to all the activities in the department, operating theatre and post-operation intensive care unit. The dates for the classroom lessons and seminars are notified to the students every three months. The internship period is agreed individually with the student. Attendance at the lessons and internships is certified by filling in a diary with the signatures of the teacher and student. At the end of the Master, the evaluation of the student satisfaction is by means of an anonymous questionnaire</p> <p>Forms of teaching: lessons; laboratories; practical work; seminars; internships; project work</p> <p>Assessment of progress: global for all the disciplines</p> <p>Final test: oral</p> <p>Further information: observation periods are also provided in the operating theatre according to the individual's skills and experience; attendance at congresses; clinical or experimental research; acquisition of</p>

12 - Diagnostic and therapeutic oncological endoscopy	
Reference area	07 - Medical sciences
Proposing department	Department of Surgical, Oncological and Gastroenterological Sciences–DISCOG
Level	2
Duration	One year
Credit points	60
Language	Italian
Director	<p>Giorgio Battaglia Department of Surgical, Oncological and Gastroenterological Sciences - DISCOG 049 8213182 giorgio.battaglia@unipd.it</p>

Objectives	The new endoscopy procedures for early diagnosis and treatment of gastrointestinal neoplastic disorders require increasingly specific and constantly updated knowledge. The main aim of the Master is to provide both the theoretic bases for the correct use of the new instrumentation, and also sufficient clinical practical work by means of a practical internship in endoscopy. The topics discussed are: the use of modern technological resources; identifying and interpreting dysplastic and/or neoplastic endoscopic situations; endoscope treatment of the upper and lower digestive tracts; clinical control of the patient after the procedure and during the follow-up; multi-discipline integration of digestive endoscopy. At the end of the Master the students will have learned the theoretic and practical notions for autonomous control of both diagnostic and therapeutic digestive endoscopy.				
Employment openings	The main aim of the Master is to provide the maximum theoretic and practical updating, so that the students have the fundamental notions for autonomous control of diagnostic digestive endoscopy and advanced operation. This course will provide health professionals with extensive clinical, endoscope, control and administration skills.				
Organization	Minimum rate of attendance required: 70% Schedule: the one to one lessons are organised around theme meetings that are held on Friday; practical work on dummies (electronic and animal) autonomously managed by the students until they reach the required hours; work in the clinic is organised in weekly shifts agreed between the students and tutor, from 09.00 to 14.00. Forms of teaching: lessons; practical work; remote teaching; internships; project work; final test Assessment of progress: global for all the disciplines Final test: oral test and practical test on model animals				
Venue	Padua and other venues in associated structures in the province. All the structures must be attended.				
Starting date	Lessons: 03/02/2014 Internships/project work: June				
Places available	Min: 5 Max: 10

**NOTICE OF SELECTION FOR ADMISSION TO MASTERS ♦ UNIVERSITÀ DEGLI STUDI DI PADOVA
FOR THE 2013/2014 ACADEMIC YEAR**

Director	Ignazio Castagliuolo Molecular Medicine Department - DMM 049 8272360 ignazio.castagliuolo@unipd.it
Objectives	The Master aims at training professionals who work within the health services, to apply the indications of the National Health Plan and the Regional Health and Welfare Plans, where multidiscipline and multiprofession evaluations are required.
Employment openings	The Master develops specific professional skills required to enable evaluating health technology, in particular in the company HTA units, in international, national and regional HTA agencies, in the HTA sections of scientific companies and regional government agencies involved with investment planning. These skills are also sought in departmental managements and manufacturers and suppliers of drugs and medical devices, and company departments working in risk management and clinical governance. The students could find openings in public and private enterprises holding positions of responsibility, either as direct employees or freelance, developing multidiscipline skills in clinical fields, personnel, technical legislative, statistics, economic and ethic management.
Organization	<p>Minimum rate of attendance required: 70%</p> <p>Schedule: the Master provides 306 hours of face to face teaching and 500 hours of internships or project work. 215 hours must be attended. The lessons are held on Friday and Saturday, one or two weeks a month. Three intensive weeks are also foreseen with daily teaching. Teaching is provided in Padua Hospital/Padua University. The internships can be replaced with project work.</p> <p>Forms of teaching: lessons; internships; final test</p> <p>Assessment of progress: for each discipline</p> <p>Final test: oral</p> <p>Further information: supplementary teaching is also provided with the Universities of Edinburgh, Barcelona, HTAi and EUnetHTA. Collaboration projects and internships are also available with them, compatibly with the available funds, and collaboration with Agenas and EUnetHTA</p> <p>SINGLE COURSES</p> <p>Certain lessons are proposed as single courses. For greater details refer to the selection notice "<i>Corsi singoli nei Master a.a. 2013/2014</i>", available in the website http://www.unipd.it/master</p>
Venue	Padua University Via Giustiniani, 2 - 35128 Padova
Starting date	Lessons: 07/03/2014 Internships/project work: May
Places available	Min: 5 Max: 20

	<p>Excess places: For disabled persons with recognized invalidity rating of 66% or more): 2</p>

15 - The nurse as a case manager	
Reference area	07 - Medical sciences
Proposing department	Department of Surgical, Oncological and Gastroenterological Sciences - DISCOG
Level	1
Duration	One year

Credit points	60
Language	Italian
Director	Bruno Martella Department of Surgical, Oncological and Gastroenterological Sciences - DISCOG 049 8212765 bruno.martella@unipd.it
Objectives	After the course, students will be able to prepare, together with their team, clinical paths for specific clinical conditions on the basis of the available evidence, prepare individual care plans with the ability to monitor the results, manage clinical paths integrating the work of each team member, guaranteeing the supported discharge, know and apply current legislation regarding integrated services, evaluate the suitability and quality of the care.
Employment openings	The professional has the previous cultural knowledge integrated with the new knowledge and skills acquired during the course. The profile is a nurse prepared to perform a fundamental role in coordinating health interventions and social assistance, according to the needs of the person and family, guaranteeing the most appropriate allocation of the resources, containing costs, and being responsible for the care given to the patient. The case manager nurse accompanies the patient throughout the entire convalescence, cooperating with the clinics as to the operative decisions and planning the interventions to prevent any duplications, redundancy, waiting, aimed at controlling the duration of the recovery to the minimum indispensable.
Organization	Minimum rate of attendance required: 70% Schedule: cycles of lessons concentrated in short periods, agreed between the teachers and students. Internships and practical work last a week. Forms of teaching: lessons; practical work; internships; project work; final test Assessment of progress: for each discipline Final test: written/oral Further information: the teaching calendar will be published when the availability of the teachers and the number of students have been evaluated.
Venue	Department of Surgical, Oncological and Gastroenterological Sciences - DISCOG Via Giustiniani, 2 - 35128 Padova
Starting date	Lessons: 03/03/2014 Internships/project work: April

Director	Paolo Prandoni Department of Cardiology, Thoracic and Vascular Studies 049 8212656 paolo.prandoni@unipd.it
Objectives	The aim of the Master is to perfect the clinical knowledge into vascular pathology. In particular the students receive an updated review of their scientific notions about vascular illnesses, such as arteriosclerosis, vasculitis and venous pathologies (with special attention paid to venous thromboembolism).
Employment openings	The Master trains skilled doctors in arterial, venous and lymphatic vascular medicine, able to conduct check-ups and non-invasive diagnostic vascular exams, prescribe suitable treatment plans, coordinate the nursing staff in looking after vascular illnesses, defining and managing the appropriate courses of primary, secondary and tertiary prevention. The graduates may be employed in national public and private health structures, with special reference to the administration of highly autonomous health activities as medical direction and specialized outpatients work in the various regional health service structures.
Organization	Minimum rate of attendance required: 70% Schedule: Periods are organised c/o the Master clinics, with the methods agreed beforehand between the teachers and students, aimed at promoting a uniform and regular course. Students also attend periodic seminars and discussion groups on clinical cases. On request, periods are also organised in preclinical institutes (Department of Biology) for experimental vascular medicine. The course includes two weeks of theoretical lessons, one at the beginning of the course and one in the second semester of the academic year (c/o the Medicine II Clinic at Padua University and the operating departments in other associated seats) and weekly lessons on clinical cases. Forms of teaching: lessons; laboratories; practical work; internships; final test Assessment of progress: global for all the disciplines Final test: dissertation discussion Further information: 4 seminars are planned during the year
Venue	Padua University Via Giustiniani, 2 - 35128 Padova Possible other seats of associated structures (within the Veneto region).
Starting date	Lessons: 01/03/2014

Director	Ornella Milanese Department for Women's and Children's Health - SDB 049 8217615 ornella.milanese@unipd.it
Objectives	The Master aims at completing the training of paediatricians in sub-specialized paediatric sectors (e.g. cardiology, nephrology, neurology, intensive care, etc.). Besides theoretic training based on interactive EBM teaching this also involves full time exposure of the students to clinical work in the specialist departments, taking direct responsibility and performing complex operations.
Employment openings (course 1)	<u>Cardiology</u> trains professionals expert in the paediatric sub-speciality, able to find employment in a level three centre (hub), or in a spoke centre, acting in this case as expert reference contact in the specific sub-speciality with the hub, or in an outpatients department providing heart screening.
Employment openings (course 2)	<u>Gastroenterology</u> trains professionals expert in the paediatric sub-speciality, able to find employment in a level three centre (hub), or in a spoke centre, acting in this case as expert reference contact in the specific sub-speciality with the hub, or in an outpatient department providing consultation and follow-up for paediatric patients with chronic liver disorders.
Employment openings (course 3)	<u>Clinical neurology and neurophysiology</u> trains professionals expert in the paediatric sub-speciality, able to find employment in a level three centre (hub), or in a spoke centre, acting in this case as expert reference contact in the specific sub-speciality with the hub, or in an outpatient department providing screening and follow-up for patients at risk or suffering paediatric neurological disorders. The notions provided during the Master and the internships are also useful for the general paediatrician, who wants to extend his/her knowledge about the physiology and pathology of

	the development stages during paediatric age.
Employment openings (course 4)	<u>Rheumatology</u> trains professionals expert in the paediatric sub-speciality, able to find employment in a level three centre (hub), or in a spoke centre, acting in this case as expert reference contact in the specific sub-speciality with the hub, or in an outpatient department providing follow-up for paediatric patients with rheumatic illnesses.
Employment openings (course 5)	<u>Onco-hematology</u> trains professionals expert in the paediatric sub-speciality, able to find employment in a level three centre (hub), or in a spoke centre, acting in this case as expert reference contact in the specific sub-speciality with the hub. Students, who attend the oncology Master course, could find employment also in local services that provide home assistance to paediatric oncological patients.
Employment openings (course 6)	<u>Pneumology and allergology</u> trains professionals expert in the paediatric sub-speciality, able to find employment in a level three centre (hub), or in a spoke centre, acting in this case as expert reference contact in the specific sub-speciality with the hub, or in an outpatient department providing follow-up for paediatric patients with allergies or chronic bronco-pulmonary illnesses. The notions provided during the Master and internships are also useful for general paediatricians who want to extend their knowledge into the more frequent problems that general paediatricians have to handle.
Employment openings (course 7)	<u>Inherited metabolic diseases</u> trains professionals expert in the paediatric sub-speciality, able to find employment in a level three centre (hub), or in a spoke centre, acting in this case as expert reference contact in the specific sub-speciality with the hub, or in an outpatient department providing follow-up for patients with hereditary metabolic diseases.
Employment openings (course 8)	<u>Nephrology</u> gives knowledge about embryology, anatomy, physiology of the urinary apparatus and genetic molecular bases of its development and functional anatomic alterations; diagnose kidney diseases from neonatal to adolescent age; know molecular diagnosis; provide knowledge about clinical and laboratory assessments of kidney functions, image diagnostics (conventional radiology, nuclear medicine, ultrasound), indications, techniques for performing and interpreting kidney biopsy (new molecular diagnosis methods on histological samples); diets, medical treatment and substitutive treatment (peritoneal dialysis), haemodialysis and kidney transplant) for terminal kidney failure and kidney illnesses, with attention paid to drug interaction; know the psychosocial problems involved with chronic invalidating illnesses; define and conduct clinical and basic research projects; manage the supervision.
Organization	Minimum rate of attendance required: 80% Schedule: from January to December 2014 Forms of teaching: lessons; laboratories; practical work; seminars; expert speakers; internships; project work; final test Assessment of progress: global for all the disciplines

21 – Mechanical circulatory support of cardiac function: technological innovation, care pathway and hub and spoke model	
Reference areas	07 - Medical sciences
	09 - Civil engineering and Architecture
Proposing department	Department of Cardiology, Thoracic and Vascular Studies
Level	2
Duration	One year
Credit points	60
Languages	Italian / English
Director	Gino Gerosa Department of Cardiology, Thoracic and Vascular Studies 049 8212410 gino.gerosa@unipd.it
Objectives	The aim of the Master is to give more in-depth knowledge about treating cardiac decompensation refractory to medical treatment. In particular, the analysis and investigation into the responsibilities of the various phases involved in assisting the patient using a mechanical circulation aid, by all those professional figures who are involved one way or another in the chain (cardiologists working locally and in the hospitals, anaesthetists, heart surgeons, physiatrists, nephrologists, infectious disease specialists, interns, hospital medical directors, biomedical engineers). Special emphasis is placed on the hub and spoke organization, where all the assistance phases converge, to the importance of the health technology assessment analysis of the various devices available and of the clinical, economic and ethic evaluations that increasingly distinguish this field of activity.
Employment openings	The Master provides new skills to specialists in heart surgery, cardiology, anaesthetics, internal medicine, medical direction, physiatrists and biomedical engineers handling the needs for assistance of patients suffering heart decompensating refractory to medical treatment, who require the implant of mechanical circulation aids. In particular, these skills are required to fully and correctly implement the assistance programmes included in the local organization network, addressed to optimise both human and financial resources.
Organization	Minimum rate of attendance required: 70% Schedule: the Master offers one to one teaching (lessons, seminars and practical work) and an internship, when the student will have access as observer of all the activities in the department, operating theatre and post-

22 – Advanced techniques of mini-invasive pelvic surgery	
Main reference area	07 - Medical sciences
Proposing department	Department for Women's and Children's Health - SDB
Level	2
Duration	One year
Credit points	60

**NOTICE OF SELECTION FOR ADMISSION TO MASTERS ♦ UNIVERSITÀ DEGLI STUDI DI PADOVA
FOR THE 2013/2014 ACADEMIC YEAR**

Languages	Italian / English			
Director	Pietro Salvatore Litta Department for Women's and Children's Health - SDB 049 8213444 pietro.litta@unipd.it			
Objectives	By attending operation sessions using advanced laparoscopy surgery techniques and personalised practical work sessions on pigs and lab cadavers, the Master aims at providing anatomical knowledge about the pelvic area and upper abdomen, and the theoretic and technical knowledge about the most advanced laparoscopy surgery procedures, and achieving autonomy in conducting predefined procedures. Famed and experienced experts assist in achieving these aims. Students will also receive a very broad and updated knowledge about the instrumentation, pre-surgery diagnosis procedures, surgical access and the methods for conducting the procedures.			
Employment openings	The Master trains young gynaecological surgeons who, through one to one lessons, practice on pelvic trainers, surgery on pigs and practical work on lab cadavers, seminars and actively taking part in surgical procedures, have acquired in depth knowledge into the techniques and management of laparoscopic pelvic surgery and who are able to implement the best organization processes, managing the indications and procedures required to successfully complete laparoscopic gynaecological surgery. Professional openings are available in public and private health services, in gynaecology and obstetrics departments.			
Organization	Minimum rate of attendance required: 70% Schedule: attendance is for 3 days a week once a month. Forms of teaching: lessons; laboratories; seminars; project work Assessment of progress: global for all the disciplines Final test: oral

23 – Pain therapy and palliative care	
Main reference area	07 - Medical sciences
Proposing department	Medicine Department – DIMED
Level	2
Duration	Two years
Credit points	60
Language	Italian
Director	<p>Francesco Ambrosio Medicine Department - DIMED 049 8213090 / 3104 francesco.ambrosio@unipd.it</p>
Objectives	<p>The approval of law no. 38/2010 regarding the use of palliative cures and pain therapy, leads to the creation of a national network service for said palliative cures and pain therapy. Over the years, many doctors have decided to work in the field of palliation and pain without any specific training however, apart from training anaesthetists about pain. The application of the above law by the National Health Service would be impeded by the lack of medical personnel who are fully prepared in this field. The demand for preparation into pain therapy and palliation is urgent and pressing, while the availability of training for health operators is very limited by the lack of specific training proposals.</p>
Employment openings	The training provided by the Master offers various openings in public and private structures for medical experts in pain therapy and palliative cures.
Organization	<p>Minimum rate of attendance required: 70% Schedule: 336 hours of direct interaction with one to one lessons (signed on entrance and exit), working in laboratories and clinical activities. The total hours, including individual study and internships, are 1500 Forms of teaching: lessons; practical work; internships Assessment of progress: global for all the disciplines Final test: written Further information: the internship can be substituted with project work</p>
Venue	<p>Medicine Department - DIMED Anaesthetic and Intensive Care Unit Via C. Battisti, 267 - 35121 Padova</p>
Starting date	<p>Lessons: 15/03/2014 Internships/project work: June</p>

AREA 08 - AGRICULTURAL AND VETERINARY SCIENCES

25 – International Veterinary Cooperation	
Reference areas	08 - Agricultural and Veterinary Sciences
	16 - Political and social sciences
Proposing department	Animal medicine, production and health department - MAPS
Level	1
Duration	One year
Credit points	60
Language	Italian
Director	Rudi Cassini Department of Compared Biomedicine and Nutrition - BCA 049 8272777 rudi.cassini@unipd.it
Objectives	In adapting to the international health standards and improving the animal production quality and quantity, the standard of the veterinary services is a strategic feature. This process also involves future EU countries and the developing countries, which work in different ways, the international agencies (FAO, OIE), government boards and NG-NP organizations. The Master aims at providing skills that can be used in these contexts, ranging from adapting the applicable standards within eastern Europe, to the typical integrated rural project, for example certain very poor situations in sub-Saharan Africa. The final aim is to prepare qualified personnel ready for international veterinary cooperation, able to plan, implement and assess the cooperation projects in technical, organizational and financial terms.
Employment openings	The Master trains experts in international veterinary cooperation, able to work with public boards, international agencies, non-government and non-profit organizations, who are able to act in all the different moments along the production chains, with specific technical skills in animal health and production, with good relational abilities, able to valorise the local resources, to plan, implement and assess the specific projects.
Organization	Minimum rate of attendance required: 70% Schedule: teaching involves one to one lessons, practical work in laboratories, meetings with experts, internships with laboratories in the sponsoring Experimental Zoo-prophylactic Institutes and veterinary cooperation projects abroad. The one to one lessons will preferably be on Fridays and Saturdays from January to June and from September to

**NOTICE OF SELECTION FOR ADMISSION TO MASTERS ♦ UNIVERSITÀ DEGLI STUDI DI PADOVA
FOR THE 2013/2014 ACADEMIC YEAR**

Director	Fabio Vianello Department of Compared Biomedicine and Nutrition - BCA 049 8276863 fabio.vianello@unipd.it
Objectives	The aim of the Master is to prepare professionals who have the necessary skills to evaluate the quality of both plant and animal based foods, beginning with the production process through to the end consumer, with special focus on organic products and those with particular features. The students will also be given the cultural means to enable preparing suitable action plans relative to food safety problems, and to work on information about food and correct behaviour.
Employment openings	The professional graduates from the Master have the skills to work in regional, provincial and council organizations that work on food quality and safety controls, and in private agrofood enterprises of both plant and animal origin foods.
Organization	<p>Minimum rate of attendance required: 70%</p> <p>Schedule: one to one lessons are held on Friday and Saturday, to reach a total of 336 hours, of which approximately 30% by means of computerised systems.</p> <p>Forms of teaching: lessons; seminars; expert speakers; remote teaching; project work; final test</p> <p>Assessment of progress: for each discipline</p> <p>Final test: written/oral</p> <p>Further information: project work is arranged with regional organizations, private firms and other entities. Study visits are planned throughout the course, and each one will include a teaching seminar held by teachers and external experts.</p>

AREA 10 - INDUSTRIAL ENGINEERING

27 – Strategic environmental management - SEM	
Main reference area	10 - Industrial engineering
Proposing department	Industrial engineering department - DII
Level	1
Duration	One year
Credit points	60
Languages	Italian / English
Director	Antonio Scipioni Industrial engineering department - DII 049 8275538 scipioni@unipd.it
Objectives	Questions regarding renewable energy sources, energy efficiency and climate change control and environmental variable matters are very topical, especially during this period of recession, as well as being increasingly mandatory and offering tangible offers of work. The Master aims at training multidiscipline figures with the skills, knowledge and ability for strategic environmental management, in environmental management systems, sustainable energy, life cycle management and climate change. The course fully considers the way Italian legislation is developing and the new skills that are requested by the employment market. Consequently the course intends giving sound knowledge about environmental technology, Italian environmental and safety legislation and life cycle management.
Employment openings	The Master prepares a multidiscipline figure for environmental management who could find professional openings in industry, in managerial positions in an organization and in consultancy. The Master provides adequate skills to work on the development and implementation of environmental management systems (EMS) identify and interpret Italian legislative requirements, conduct EMS audits, be responsible for rational energy use (energy manager), use environmental communications and enterprise social responsibility tools, develop and implement climate altering emission monitoring systems, basic training in life cycle management, basic training about health and safety in the workplace.
Organization	Minimum rate of attendance required: 80% Schedule: The Master lasts 10 months (February – November 2014). A total of 1500 hours is involved divided as 328 hours of one to one

	<p>lessons, 475 hours of internships and/or project work, 697 of individual study and preparing the final dissertation. The lessons are held on Friday afternoon and Saturday morning (8 hours) for 3 consecutive weeks, on Friday and Saturday morning (12 hours) for the 4th and 5th week, for a variable cycle every 5 weeks.</p> <p>Forms of teaching: lessons; internships</p> <p>Assessment of progress: global for all the disciplines</p> <p>Final test: written/oral</p> <p>Further information: company visits, team work.</p> <p>SINGLE COURSES</p> <p>Certain lessons are proposed as single courses. Objectives	The main aim is to train experts and consultants in integrated tourist product management and communications. The study plan involves various disciplines able to respond, through interactive experiences, to the numerous needs for knowledge and skills that are required today to work in tourism. Each country has its original heritage (archaeological, historic-artistic, linguistic-literary, environmental, immaterial) that has to be protected, communicated and cultivated. Students are taught how to face and manage complex problems involving the governance of the local tourist resources, giving value to and promoting the cultural and environmental heritage, planning tourist marketing strategies, public and private fundraising campaigns and European planning.
Employment openings	The Master trains experts and consultants in tourist management, according to the cultural and environmental resources of the area, respecting the principles of sustainable and enduring tourism, with skills in obtaining and managing national and local funds and from the EU development funds, to give value to cultural assets and tourist resources, able to promote and communicate the tourist products using modern marketing methods, enhancing the distinguishing features and strong points.
Organization	Minimum rate of attendance required: 70% Schedule: lessons are held on Thursday afternoon and Friday, for a total of 12 hours a week over the 12 months, together with day educational

AREA 13 - HISTORY, PHILOSOPHY AND PEDAGOGICAL SCIENCES

30 – Disability and inclusive education in institutions and environment	
Main reference area	13 - History, Philosophy and Pedagogical Sciences
Proposing department	Department of Philosophy, Sociology, Pedagogy and Applied Psychology – FISPPA
Level	1
Duration	One year
Credit points	60
Language	Italian
Director	Elisabetta Ghedin Department of Philosophy, Sociology, Pedagogy and Applied Psychology - FISPPA 049 8271703 elisabetta.ghedin@unipd.it
Objectives	The aim of the Master is to provide specific project planning skills (including detailed project work under supervision); extending and investigating further the responsibilities regarding disabilities for those who work in operational, planning and management roles regarding inclusive education projects, and the management and coordination of educational and training services; extending and investigating specific skills in the areas of sight and hearing disabilities with special focus on the home reader and repeater; defining and reinforcing the professional levels currently in the institutions and local area, with special focus on the technology and facilitators to construct inclusive environments.
Employment openings	An expert trained in this Master will be able to operate as an employee or through a contract with all the social-health and welfare educational agencies and services (schools, councils, provincial and regional boards, local health authorities) and in associate and productive structures locally (communities, social cooperatives, tertiary areas). Special focus is placed on training home readers-repeaters.
Organization	Minimum rate of attendance required: 70% Schedule: the Master will mainly provide two weekends a month of 15 hours each. A braille writing and reading workshop will be implemented and a workshop into basic LIS and oral approach. Residential experiences could also be provided. Forms of teaching: lessons; laboratories; remote teaching; internships; project work Assessment of progress: global for all the disciplines Final test: oral

Proposing department	Department of Philosophy, Sociology, Pedagogy and Applied Psychology – FISPPA
Level	1
Duration	One year
Credit points	60
Language	Italian
Director	Carla Callegari Department of Philosophy, Sociology, Pedagogy and Applied Psychology - FISPPA 049 8271718 carla.callegari@unipd.it
Objectives	The Master provides the pedagogical-educational, methodological, library economical and governance guidelines to define and qualify the professional school librarian and public librarian working in the services for children of all ages and young adults. The psycho-pedagogical theories regarding reading, book animation and information literacy, besides the international standards defined by IFLA and IASL, for professional librarians working with a young public, are landmarks skills to be acquired. A sound education is provided, with examples of best practices, so that students acquire the skills regarding the dual mission of this specific type of library service: promote reading, information and research within a multimedia culture and documentation of the various activities.
Employment openings	The Master offers possible openings as librarian in the infants', children's and young adult's section of public libraries and local cultural services.
Organization	<p>Minimum rate of attendance required: 70%</p> <p>Schedule: The Master is held throughout the academic year with 18 hours per week, preferably concentrated at the weekend. The Master includes intensive teaching in relation to the course objectives and availability of the students. The course includes one to one lessons and seminars, and other forms of guided study and interactive teaching, together with functional internships to qualify professional librarians-animators.</p> <p>Forms of teaching: lessons; seminars; internships; final test</p> <p>Assessment of progress: global for all the disciplines</p> <p>Final test: written</p> <p>Further information: 200 hours internship in the school and/or public library, in Italy or abroad, visit to at least two local libraries.</p> <p>For students to satisfy the obligations of the course, they will take part in</p>

Director	Gabriella Chiaramonti Department of Historic, Geographic and Antiquity Sciences - DISSGEA 049 8278551 gabriella.chiaramonti@unipd.it
Objectives	The aim of the Master is to provide the necessary knowledge and tools to candidates who already have received higher training in various fields who, for their cultural interest, activities or future projects want to develop their relations in the various Latin American contexts, in a cooperation framework with the institutions, parties and enterprises that work in Latin America, or community organizations that are related to them. Achieving these objectives is particularly important in a scenario where finding openings in Latin America is a strong drive. The Master responds institutionally to training requirements in historic, political-economic, anthropological-social, linguistic-literary fields, which are not fully satisfied currently in an articulated interdisciplinary manner, by proposing the vision that is as broad, current and in-depth as possible.
Employment openings	The Master trains specific skills in Latina American elements for professional figures such as: intercultural mediators who are expert in public, health, juridical and educational administration; export area managers; international relations experts for government agencies; non-government organization operators; human rights operators; public relations and corporate communications experts; editorial assistants.
Organization	<p>Minimum rate of attendance required: 70%</p> <p>Schedule: the Master involves 300 teaching hours, divided in 144 hours of lessons, 126 hours of seminars, 30 hours of laboratories. This is then complemented by an internship/project work lasting at least 200 hours, with the preparation of the final dissertation.</p> <p>Forms of teaching: lessons; laboratories; seminars; internships; final test</p> <p>Assessment of progress: global for all the disciplines</p> <p>Final test: discussing the final dissertation based on the project work or internship.</p> <p>Further information: the students are able to use a network of contacts that have already been activated in both Italy and Latin America, according to their individual projects which are assessed beforehand by the organization committee. All the available mobility procedures are also used to enable profiting from the input from teachers and experts. Students are able to attend the Latin American Film Festival, an annual event attracting directors from everywhere, and also offering in-depth information about current topics. Students are also able to attend the Controsguardi Film Festival in Perugia</p> <p>SINGLE COURSES</p> <p>Certain lessons are proposed as single courses. For greater details refer to the selection notice "<i>Corsi singoli nei Master a.a. 2013/2014</i>", available in the website http://www.unipd.it/master</p>

Director	Adone Brandalise Department of Language and literary studies - DISLL 049 8274860 adone.brandalise@unipd.it
Objectives	The Master aims at providing theoretic and practical skills to enable working in intercultural fields, providing information about migratory processes and correlated transformations, spaces for reflection and critical analysis. The first course is specialized in social and cultural mediation, aware of the conflicts and unease in the various social contexts (schools, on the street, public services, work, family), and intends highlighting the potentially constructive and development aspects, if it is correctly recognized and handled with a view of mediation. The second course is about the organization of intercultural events and activities: using the various artistic and literary expressions, in close collaboration with the schools and communities of immigrants, it intends developing the ability to conceive, plan and manage activities that valorise the diversities and promote intercultural dialogue.
Employment openings (course 1)	<u>Social and cultural mediation</u> as experts in intercultural matters, the professionals will find openings as consultants and operators for public administrations, boards and enterprises, non-government and non-profit organizations; experts in schooling and permanent training; intercultural mediators and operators in research and documentation structures. The Master trains operators able to conceive and organise activities to overcome the conflicts and valorise the human resources, in public and private contexts, in the media and production world, from schools to services, personnel management to the promotion of cultural initiatives.
Employment openings (course 2)	<u>Organization of events and intercultural activities</u> is the communications sector that is growing fastest, second only to the web. The professionals will find employment as experts in the organization of intercultural events; they could work as consultants and operators in public administration agencies, in private organizations, associations and enterprises; work in permanent training and as school consultants and mediators to construct intercultural teaching activities and courses; work in cultural centres, research centres into the arts, documentation centres, communications and public relations agencies, agencies that use artistic expression as a means to attract and develop local tourism, and in any context that promotes intercultural dialogue.
Organization	Minimum rate of attendance required: 70% Schedule: the course is from January to December 2014. From January to July and from September to October there are one to one lessons, laboratories and assisted teaching (seminars, meetings with experts) for a total of 200 hours, with compulsory attendance of 70% (signed register); lessons are held in Padua on Friday and mainly Saturday and Sunday. Additional teaching activities will be proposed during the year. The student chooses between the two courses: Social and cultural mediation (186 hours one to one lessons, 30 hours laboratories; 84 hours

	<p>seminars), and Organization of intercultural events and activities (204 hours one to one lessons, 30 hours laboratories; 66 hours seminars). Some activities are joint. Both courses provide an internship or project work of at least 200 hours, with preparation of the final report, completing an analysis report and a final test (dissertation discussion).</p> <p>Forms of teaching: lessons; laboratories; seminars; internships; final test</p> <p>Assessment of progress: global for all the disciplines</p> <p>Final test: written/oral</p> <p>Further information: remote teaching activities using e-learning and social networks to supplement the classroom lessons. The final assessment is by discussing the dissertation and internship report. The individual teachers may decide to conduct progress controls (papers, presentation of small team work results, questionnaires, etc.). Various types of project work are proposed, including cooperation in the ImmaginAfrica Project (http://www.immaginafrica.history.unipd.it/), the online Master magazine Trickster (http://www.trickster.lettere.unipd.it) and research projects under the supervision of the Master teachers. The 200 hours internship may be replaced with 200 hours of project work under the supervision of one of the Master teachers.</p>

35 – Theory of argumentation and strategic communication practice in crisis, conflicts and emergencies	
Reference area	13 - History, Philosophy and Pedagogical Sciences
Proposing department	Department of Philosophy, Sociology, Pedagogy and Applied Psychology - FISPPA
Level	1
Duration	One year
Credit points	60
Language	Italian
Director	<p>Adelino Cattani Department of Philosophy, Sociology, Pedagogy and Applied Psychology - FISPPA 049 8274715 adelino.cattani@unipd.it</p>
Objectives	<p>The Master combines argumentation theory and practice in strategic communications. In any situation, no matter how critical or serious, good sense must first of all prevail: this is the task of the reborn argumentation theory. In any situation, especially a crisis, conflict or emergency, the right communication is a decisive factor, and this is the task of strategic communication. This is a post graduate Master for those for whom</p>

	communication is a marked and critical skill: it is addressed to those who create communications (consultants, public relations operators), who manages them (spokespeople, law enforcement, negotiators, lawyers, mediators) and who analyses the impact (academics, researchers). Specific addressees are managers and operators who interact in problematic situations and have to handle particularly difficult conditions.					
Employment openings	According to the previous professional skills that have been acquired, the Master foresees employment openings in: civil mediation, cultural mediation, public relations, mass media and journalism, health, psychology and psychotherapy, forensic science, law enforcement and the armed forces.					
Organization	Minimum rate of attendance required: 70% Schedule: a two weekly course, on Friday afternoon and Saturday. On Friday afternoon theory courses for 4 hours, and on Saturday morning and afternoon theory and practice for 8 hours. Forms of teaching: lessons; laboratories; seminars; remote teaching; internships; project work Assessment of progress: global for all the disciplines; Final test: written/oral SINGLE COURSES Certain lessons are proposed as single courses. For greater details refer to the selection notice “ <i>Corsi singoli nei Master a.a. 2013/2014</i> ”, available in the website http://www.unipd.it/master					
Venue	Classrooms in the Department of Philosophy, Sociology, Pedagogy and Applied Psychology - FISPPA Other seats of associated structures

Director	<p>Laura Dal Corso Department of Philosophy, Sociology, Pedagogy and Applied Psychology - FISPPA 049 8276590 dalcorso@unipd.it</p>
Objectives	<p>The Master trains specialists in human resources management, able to act on the person and organization of the assessments, training and development, in the prospect of organizational efficiency/efficacy, risk prevention and health and safety protection, in psychological, juridical-economic, medical and ethical terms. This person is a key factor in production and at the same time responsible for the organization that has to be protected and valorised. In line with the latest European and national regulations, this definition requires increasingly complex and articulated professional spaces within human resources.</p>
Employment openings	<p>By developing the knowledge and experience obtained by the students, which are broad and varied in their various training courses and work, the Master transforms them into specific professional skills useful to work in human resources management, particularly in personnel offices, in assessments, training and development, work related risk prevention and health and safety in the workplace. Students could find openings in public and private organizations, production and service companies, profit and non-profit organizations, as managers, high profile collaborators or as freelance operators.</p>
Organization	<p>Minimum rate of attendance required: 70% Schedule: the Master involves 216 hours of one to one lessons, 84 hours remote teaching and 200 hours internships/project work. A minimum of 210 lessons must be attended. The lessons are held on Saturday (once or twice a month). There are also 2 intensive weeks with daily lessons, indicatively the first week in February and the second week in September. The lessons are held in Padua University or other associated seats in the various towns. The internship can be replaced by individual project work of 200 hours. Forms of teaching: lessons; remote teaching; internships; final test Assessment of progress: global for all the disciplines Final test: oral Further information: other additional teaching activities are provided (conferences, workshops, expert speakers, conventions, guided visits, etc.). To research the internship, each student may consult the Master tutor for the contents, and the University Internships and Career Service for the administration and organization details.</p> <p>SINGLE COURSES Certain lessons are proposed as single courses. For greater details refer to the selection notice "<i>Corsi singoli nei Master a.a. 2013/2014</i>", available in the website http://www.unipd.it/master</p>

Language	English
Director	Fiorenza Belussi Department of Economic and Business Science "Marco Fanno" - DSEA 049 8274051 fiorenza.belussi@unipd.it
Objectives	Train figures in international business and innovation subjects, with specialized skills focused on concepts, contents, language and methods for management and business internationalisation management, both for multinationals and local enterprises that are pursuing internationalisation. Prepare young post graduates to work in international contexts as junior managers of international businesses and organizations that want to initiate development projects. Introduce students to the world of international business and organizations. Provide a stimulating learning atmosphere by studying international cases.
Employment openings	The Master aims at preparing complex figures to support business internationalisation processes. The Master offers a sound knowledge of various management fields (organization, marketing and strategy) and specific skills to support the company's innovation activities. A junior manager is created for the following company functions: export manager, project manager, human resources manager, innovation manager and manager of international chains of sub-supplies, outsourcing processes and establishing new branches abroad.
Organization	<p>Minimum rate of attendance required: 80%</p> <p>Schedule: lessons are from January to June followed by a compulsory internship of 3 months. The course finishes with the preparation and discussion of the project work. Lessons are held on Friday (8 hours) and Saturday (7 hours). Days are also dedicated to group work and individual study known as 'Study Breaks' or 'In-class Study Break'</p> <p>Forms of teaching: lessons; internships; project work; final test</p> <p>Assessment of progress: for each discipline</p> <p>Final test: Prepare the final project work with the academic tutor and business tutor.</p>

	Further information: the Master provides a compulsory internship of 3 months with a company and the preparation of the final project work, detailing the internship experience and analysing any particular problems related to the training contents given by the Master.
Venue	Department of Economic and Business Science "Marco Fanno" - DSEA Via Ugo Bassi, 1 - 35131 Padova

AREA 16 - POLITICAL AND SOCIAL SCIENCES

40 – Critical criminology and social security. Deviance, city and prevention policies	
Reference area	16 - Political and social sciences
Inter-university	Proposing department of Padua University: Philosophy, Sociology, Pedagogy and Applied Psychology - FISPPA Other universities involved (issue a joint certificate): Alma Mater Studiorum University in Bologna
Level	1
Duration	One year
Credit points	60
Language	The majority of lessons are in Italian. When they are held in English and French, simultaneous translation is guaranteed.
Director	Giuseppe Mosconi Department of Philosophy, Sociology, Pedagogy and Applied Psychology - FISPPA 049 8274303 giuseppe.mosconi@unipd.it
Objectives	The Master provides in-depth knowledge about the matters involved with the production of deviant phenomena and their social construction, and the social control processes that determine the current forms of deviance management. These aims are in line with the fact that the numerous problems involved with social exclusion and precarious situations caused by the current crisis, do not receive an adequate response from the institutions. Special attention is paid to petty crime, the relationship between immigration and deviance, juvenile and female deviance, overcrowded prisons, new types of relations with drugs, interpreting the feelings of insecurity. The course aims at developing alternative prospects to the traditional punitive and imprisonment models.
Employment openings	The Master opens the following employment prospects: social researcher into deviance, criminality, security, prevention, handling the various forms of distress and social exclusion; consultant and operator in these fields referred to local administrations, to related tertiary services, to the associations; researcher, consultant and operator in judicial, penitentiary sectors and reintegration services for ex-convicts; guarantor for the rights of convicts and promoter for the application of relative national and European laws.
Organization	Minimum rate of attendance required: 75% Schedule: lessons are held in Padua (17 weekends) and Bologna (8 weekends) on Friday (from 14.00 to 18.00) and Saturday (from 9.00 to 13.00 and 14.00 to 18.00)

	<p>Forms of teaching: lessons; practical work; internships; final test Assessment of progress: global for all the disciplines Final test: written/oral Further information: the internship can be replaced with the project work</p>
Venue	<p>Department of Sociology, Padua University (prevailing) Via Cesarotti, 10/12 - 35123 Padova</p> <p>Alma Mater Studiorum University in Bologna</p>

44 - Mindfulness and non-conventional practice in Clinical psychology and Health psychology	
Main reference area	17 - Psychological sciences
Proposing department	Department of Philosophy, Sociology, Pedagogy and Applied Psychology - FISPPA
Level	2
Duration	One year
Credit points	60
Language	Italian
Director	Marco Sambin Department of Philosophy, Sociology, Pedagogy and Applied Psychology - FISPPA 049 8278462 marco.sambin@unipd.it
Objectives	The Master offers specific skills to evaluate cases, to listen and support addressed to enhancing clinical knowledge and operating strategies. The objectives fall within three main categories of the Master subjects: epistemology, holistic psychology and unconventional intervention methods. In relation to epistemology, it offers new paradigms that are at the base of the conception of holistic psychology, referred to quantum physics and constructivism. In relation to holistic psychology, the Master aims at introducing a holistic vision of man, health and care. Finally, in relation to intervention, it aims at teaching unconventional intervention methods such as mindfulness and other forms of meditation.
Employment openings	The Master promotes employment in the health contexts or other spheres that work on health, where a holistic vision is required. Consequently the skills learned through the Master could be used in all those situations where personal suffering is treated, considering the complexity of the problem and not only valorising the biological aspects but also the psychological ones and the interaction between psyche and soma.

45 – Clinical Neuropsychology	
Main reference area	17 - Psychological sciences
Proposing department	Department of General Psychology - DPG
Level	2
Duration	One year
Credit points	60
Language	Italian
Director	Daniela Mapelli Department of General Psychology - DPG 049 8276570 daniela.mapelli@unipd.it
Objectives	The request for expert post-grad neuropsychologists is constantly growing. This is mainly due to the progress of research into neurocognitive sciences that have generated the development of new public and private centres for the diagnosis and rehabilitation of cognitive disorders. The Master aims at satisfying this training need. Expert and highly qualified neuropsychologists could be trained through an intensive course running during the year.
Employment openings	The Master prepares experts in neuropsychology able to work in both private activities and in private or public health and welfare structures.
Organization	Minimum rate of attendance required: 80% Schedule: lessons are held on Saturday from 10.00 to 17.00 and during two intensive weeks (one in February and one in September). Forms of teaching: lessons; seminars; internships; final test Assessment of progress: global for all the disciplines Final test: written/oral
Venue	Department of General Psychology - DPG Aule di Via Venezia, 12 - 35131 Padova
Starting date	Lessons: 25/01/2014 Internships/project work: January
Places available	Min: 12 Maximum EU citizens: 22 Maximum non-EU citizens: 2 (Maximum total: 24) Excess places: For disabled persons with recognized invalidity rating of 66% or more: 2

FOR THE 2013/2014 ACADEMIC YEAR**

	single instruments involved. Specific individual, couple and family intervention models are also proposed, in particular counselling models and supportive interventions.
Employment openings	The fundamental aims of the Master are to provide specific skills in individual psychodiagnosis assessment, in counselling techniques (individual, parental couple and married couple), and acquiring these methods transversally from normality versus pathology. Through specific training, the Master provides skills in psychodiagnosis, intervention, counselling and supporting therapy. The Master trains professionals able to evaluate a patient (using various diagnosis instruments) differentiated between developing age and adult age. Personality assessment is at the base of the work with any patient and in various fields: psychology, psychiatry and forensics, in public services (e.g. clinics, infant neuropsychiatry, etc.) and private.
Organization	<p>Minimum rate of attendance required: 75%</p> <p>Schedule: teaching is divided as follows: 300 hours one to one lessons (two weekends a month: Friday, Saturday and Sunday all day) and 300 hours of internship/project work. The internship may be replaced with the project work.</p> <p>Forms of teaching: lessons; laboratories; internships; final test</p> <p>Assessment of progress: global for all the disciplines</p> <p>Final test: oral</p>

47 - Psychology of aging	
Reference area	17 - Psychological sciences
Proposing department	Department of General Psychology – DPG
Level	2
Duration	One year
Credit points	60
Languages	Italian / English
Director	Rossana De Beni Department of General Psychology - DPG 049 8276604 rossana.debeni@unipd.it
Objectives	The Master aims at preparing professionals in the three main areas of geriatric psychology. We expect students to learn the specific knowledge and skills regarding multidimensional evaluation, to then apply and implement cognitive, motivational, emotive and personality rehabilitation and reactivation actions (general psychology); manage anamnestic and psychodiagnostic interviews with the elderly, family and caregiver, the use of tests, counselling and psychological support for the elderly person and his/her family; the resources and potential of the elderly and his/her environment, and the services addressed to them, to enable implementing training courses that prevent the burden on the local operators (work and organization).
Employment openings	The professional who graduates from the Master can find openings in RSA services, day centres, in territorial and council projects to prevent cognitive decline and for active aging; they can find work in research structures into the diagnosis and treatment of the pathologies, and in associations looking after the elderly and their rights.
Organization	Minimum rate of attendance required: 80% Schedule: lessons are held every 15 days on Friday (from 10.30 to 18.00) and Saturday (from 9.00 to 14.00) divided between Padua and Treviso. One or two weeks of intensive lessons are also provided (from Monday to Saturday from 9.00 to 18.00) on dates to be defined. Only on certain weekends the conferences with external experts and the practical

	work are held on Saturday afternoon, from 15.00 to 18.00 Forms of teaching: lessons; internships; final test Assessment of progress: global for all the disciplines Final test: final dissertation
Venue	Department of General Psychology - DPG Via Venezia, 8 - 35131 Padova Other seats of associated structures outside Padua
Starting date	Lessons: 24/01/2014 Internships/project work: February
Places available	Min: 15 Max: 40

Director	Giulio Vidotto

	Department of General Psychology - DPG 049 8276683 / 334 6707278 giulio.vidotto@unipd.it
Objectives	The Master aims at preparing professionals able to act in different sports context depending on competition level (federations, national teams, and also amateur and youth contexts).
Employment openings	Students will be able to combine their knowledge from their university training with the skills acquired in the Master, enabling them to help and support sports teams and individual athletes. Furthermore, given the specific training in the developing age field, students will easily be able to apply their skills to all the sports groups for children and adolescents, helping trainers to valorise the sport as a moment for personal growth. The trained professionals will be able to offer their skills to various outlets: sports federations, large sports groups, single athletes, sports promotion boards, or to schools and the different people involved with sports (trainers, parents, administrators, referees, etc.).
Organization	<p>Minimum rate of attendance required: 75%</p> <p>Schedule: attendance is documented by signing the register at the beginning and end of the lessons</p> <p>Forms of teaching: lessons; seminars; internships; final test</p> <p>Assessment of progress: global for all the disciplines</p> <p>Final test: written/oral</p> <p>Further information: the final test is the discussion of a dissertation by the student on the course topics and practical activities</p>

Director	<p>Cesare Cornoldi Department of General Psychology - DPG 049 8276603 cesare.cornoldi@unipd.it</p>
Objectives	<p>The Master provides knowledge and operational instruments to work with problems of scholastic learning, and the emotive, motivational and behavioural aspects. The Master prepares expert professionals (psychologists, neuropsychiatrists, educators, etc.) able to identify the learning disorders (dyslexia, dysgraphia, disortography, and dyscalculia) and other learning problems (difficulty in understanding, studying, attention, memory, etc.), using specific assessment tools. For each problem the Master gives in-depth analysis of the treatment, proposing for each critical point the pinpointed and effective techniques and materials. The aim of the Master therefore, is to provide solid diagnostics and treatment methods for learning disabilities and often associated problems, such as ADHD.</p>
Employment openings	<p>The Master trains experts in learning disabilities and, in particular, in the diagnosis and treatment of problems with reading, calculation, attention,</p>

**NOTICE OF SELECTION FOR ADMISSION TO MASTERS ♦ UNIVERSITÀ DEGLI STUDI DI PADOVA
FOR THE 2013/2014 ACADEMIC YEAR**

Duration	One year
Credit points	60
Language	Italian
Director	Giuseppe Sartori Department of General Psychology - DPG 049 8276608 giuseppe.sartori@unipd.it
Objectives	The aim of the Master is to train the students in the various fields of juridical psychology: forensic, criminal, judicial, legal, rehabilitation. In particular, the following topics are handled: elements of criminal and civil law and procedures; elements of juvenile and family law; psychology of judicial reasoning and judicial regulations; juridical epistemology; forensic psychopathology; forensic neuropsychology and psychophysiology; elements of juridical psychosexuology; assessment tools and their application regulations in juridical contexts; elements of criminology, legal-medicine and penitentiary psychology. Master students will be able to develop specific knowledge and skills regarding the ability to integrate their knowledge, and apply it to the forensic or juridical situation. Preparation of a technical and expert consultation report; assistance and consultation for the process operators.
Employment openings	The Master trains professionals such as consultants as court experts, for law firms, legal medicine firms, and expert lawyers in forensic psychology.
Organization	Minimum rate of attendance required: 80% Schedule: lessons are usually held on Saturday, with three intensive weeks (with lessons from Monday to Saturday) during the year. Forms of teaching: lessons; expert speakers; internships; project work; final test Assessment of progress: global for all the disciplines Final test: written/oral
