UNIVERSITY OF PADOVA – SCHOOL OF PSYCHOLOGY
CRITERIA TO DRAW UP MERIT LISTS
ERASMUS+ FOR STUDIES, UK AND SEMP MOBILITY CALL FOR APPLICATIONS ACADEMIC YEAR 2021/2022

The <u>merit score</u> given to each question is 30 points which are the result of adding up the scores given according to each criterion (1,2,3). In the event a candidate will have gained more credits compared to the maximum obtainable (30, 90, 150), the score will be over the 30 points and it won't be rounded. The score is calculated as follows:

- 1 point is subtracted for each year extra it has taken the student to pass their exams
- 18 points max are given for certified language proficiency as per the criteria set in the "Criteria to select Erasmus candidates" file.
- 20 points max are given for the mandatory interview with the person in charge of the flow (if envisaged)
- 15 points are added in the event of pre-arranged thesis/traineeship
- 0,5 points for an Italian Ba Degree with result 110/110 cum laude

1. Bachelor's degree courses

	Criterion 1	Criterion 2	Criterion 3
1st year	10 points for: - final grade of the school leaving certificate* (the score is obtained by multiplying the grade by 10 and dividing it by 100) For example: 10 x (86/100)	10 points for: Average mark of exams registered at the time online applications close (the mark is obtained by multiplying the average in thirtieths of the exams registered at the time online applications close - weighted with the no. of credits of each exam - by 10 and then dividing it by 30) For example: 10x[(30x6CFU+28x9CFU)/(6CFU+9CFU)]/30	10 points as first year bonus

2nd year	20 points for: Average mark of exams registered at the time online applications close (the mark is obtained by multiplying the average of the exams registered at the time the application is submitted - weighted with the no. of credits of each exam - by 20 and then dividing it by 30) For example: 20x[(30x6CFU+28x9CFU)/(6CFU+9CFU)]/30	10 points for: Ratio between the number of credits from exams registered at the time online applications close and the overall number of credits from exams the student needs to acquire by that date (the score is obtained by multiplying by 10 the value of the ratio between no. of CFU gained and potentially gained at that moment, which is set at 90 CFU) For example: 10x70 CFU/90 CFU	
3rd year	15 points for: Average mark of exams registered at the time online applications close (the mark is achieved by multiplying the average of the exams registered at the time the application is submitted - weighted with the no. of credits of each exam - by 15 and then dividing it by 30) For example: 15x[(30x6CFU+28x9CFU)/(6CFU+9CFU)]/30	15 points for: Ratio between the number of credits gained at the time online applications close and the overall number of credits from exams the student needs to acquire by that date (the score is obtained by multiplying by 15 the value of the ratio between no. of CFU gained and potentially gained at that moment, which is set 150 CFU) For example: 15x130 CFU/150 CFU	

2. Master's degree courses

	Criterion 1	Criterion 2	Criterion 3
1st year	20 points for: Final grade of the Bachelor's degree* (the score is obtained by multiplying the grade by 20 and dividing it by 110) For example: 20 x105/110=19.1	10 points for: Average mark of exams registered at the time online applications close (the mark is obtained by multiplying by 10 and then dividing by 30 the average in thirtieths of the exams taken at the time the application is submitted, weighted with the no. of credits of each exam taken) For example: 10x[(30x6CFU+28x9CFU)/(6CFU+9CFU)]/30	
2nd year	15 points for: Average mark of exams registered at the time online applications close (the mark is obtained by multiplying the average of the exams registered at the time the application is submitted - weighted with the no. of credits of each exam - by 15 and then dividing it by 30) For example: 15x[(30x9CFU+28x6CFU)/(9CFU+6CFU)]/30	15 points for: Ratio between the number of credits from exams gained at the time online applications close and the overall number of credits from exams the student needs to acquire by that date (the score is obtained by multiplying by 15 the value of the ratio between no. of CFU gained and potentially gained at that moment, which is set at 60 CFU for the 1st call for applications candidates and 90 CFU for the 2nd call for applications candidates. For example: 15x60 CFU/90 CFU	

*= in the event an international high school diploma and Ba degree won't have a score who can be converted into the Italian grading system, will be applied the minimum score (60/100 for high school diplomas, 66/110 for Ba degrees)
