

Honour Tracks – Cancer 2023-2024

Master + PhD grants

The [University of Lyon1](https://www.univ-lyon1.fr) is very proud to announce the SFRI Scholarships in support of excellent students that wish to take up their master's studies and PhD in France. The scholarship will start during the academic year 2023-2024.

Within the framework of the International Development Graduate Track (SFRI – InnovInOnco), we are offering a full student's scholarship for 4 years:

- 10 months M2 scholarship – 600 €/months
- 3 years PhD grants – 40 k€/year

A choice of four possible speciality:

- **Cancer Biology**

Focus on the latest fundamental discoveries in the biological mechanisms of cancer - Lectures given by internationally recognised researchers.

- **Therapeutic Innovations in Oncology**

Focus on drug design, therapeutic innovations and clinical trials in oncology in collaboration with teachers from the Lyon Veterinary School (cancers in pets).

- **Precision Medicine in Oncology**

Analysis and use of digital data in oncology and the socio-economic, ethical and societal aspects of this «massive data», divided into two specialities: bioinformatics analysis of «omics» data or Health Humanities Sciences (HHS) dimension.

- **Cancer Bioengineering Master**

Focus on the transdisciplinary teaching of physico-chemical properties of cancers, innovative technologies (biomechanics in 3D models, microfluidics and new devices) to better approach the physiology of the tumour in vitro.
