

Airspace medicine

Professional outlets: The Course in Airspace Medicine permits a deep evaluation of all the themes regarding physiologic and pathologic changes in conditions of flight and airspace. From a professional point of view, certification aspects are particularly important and many Specialists in legal medicine and Occupational medicine participate to the Course each year. The course is recognized in the context of the activities which may contribute to the achievement of the authorization of Aviation Medical Examiner (AME). The Course is of particular interest, from cultural and professional points of view, for all the physicians involved in Health Services in the airspace field (health services of airports, ecc.).
