

Short Specialisation degrees 2021/2022

Andrological endocrinology, human reproduction and sexual medicine

Professional outlets: The Master forms professionals with clinical-diagnostic and biological experience in reproductive medicine on the basis of the medical (endocrinology, urology, gynecology) or biological (biology, biotechnology, embryology) and psychological specializations involved in this field.

At the end of this Master the acquired skills and competence will allow to perform clinical and research activity in public and private centres of Reproductive Medicine, Andrology and Endocrinology, including centres dealing with Sexual Medicine. Both medical, biological and psychological competence and knowledge will allow to work in assisted reproduction centres for general andrological skills and in vitro fertilization techniques.
