

Architectural and Landscape Psychology

Professional outlets: The Master forms experienced professionals in environmental psychology, able to operate in multidisciplinary settings, and collaborate in urban design and architecture projects, with a view to environmental enhancement and promotion of well-being. Psychologists who are expert in environmental psychology may collaborate with policy makers, urban planners, architects, and engineers, to create safe, healthy, and inviting spaces in schools, prisons, cities, offices, and homes. Policy makers, urban designs, architects, experts in cultural heritage may use knowledge from the Master to enrich their competences and their professional interventions.
