

Short Specialisation degrees 2019/2020 – University of Padova

ART and human reproduction

Professional outlets: The learner will be able to acquire in-depth knowledge about the diagnostic-therapeutic clinical pathways of the medically assisted procreation of I, II and III level. It will also acquire advanced knowledge of seminology, manipulation techniques and cryopreservation of gametes, preservation of fertility, as well as the most modern laboratory methods in the field of PMA.

The knowledge acquired through the master will allow the learner to obtain appropriate skills for its placement in public and private PMA centers.
