

Circular Engineering & Architecture

Professional outlets: This Master is dedicated to engineers, architects, designers who carry out or intend to carry out environmental design activities in professional firms and private companies, public administrations, international institutions, ONG, Energy Service Companies, Utilities companies.

The master trains new professional figures able to work in teams in order to guarantee, manage and structure the process of creating an architectural and/or an engineering project that relates to the fundamentals of nature by connecting customization processes through software and technologies of last generation. Thanks to the aforementioned skills, these figures place themselves in line with the most recent warnings of the European directives.
