

Short Specialisation degrees 2021/2022

Osseointegrated Implantology

Professional outlets: The Master in osseointegrated implantology aims to teach the basic principles of surgery and implantology.

Through lectures and practical assistance, participants in the Master have the opportunity to learn about new implant techniques, both surgical and prosthetic.

This enables them to be at the forefront of knowledge of literature, protocols and complications, developing the ability to make a correct diagnosis which is the basis of treatment success. Furthermore, the ability to treat both simple and complex cases, allows them to integrate successfully implant in the market.
