

**Otoneurosurgery: a multidisciplinary approach to the microsurgery of the skull base**

Professional outlets: The Master has the aim to provide the theoretical knowledge and the cultural elements of the skull base microsurgery and the clinical practise to manage the lesions of this area. The final target is to train skull base surgeons that can be able to work and collaborate and learn together with the Otolologist and the Neurosurgeon. Nevertheless the Master is tailored also for Neurosurgeons and Otolaryngologists who wants to learn about the multidisciplinary management of the skull base pathology and the correct timing and way to interface with a skull base group in order to treat correctly the pathologies. During the Master different type of surgical approaches will be treated: infratemporal approaches, translabyrinthine and retrosigmoid, subtemporal approach, giugular foramen approach, and different combined surgical approaches.
