

**Perinatal medicine and neonatal intensive care**

Professional outlets: At the end of the program, the participant is able to know and understand the most relevant physiological and pathophysiological clinical cases. He has the basis to manage the most frequent emergency situations. He recognizes symptoms and signs of neonatal diseases and their therapy. He knows the problems related to the medicine of the neonatal transport. He is able to prepare and realize a comprehensive program on the care of the newborn, including chronic diseases of neonatal origin and to follow these patients over the time. The participant may evaluate parental needs and develop communication competences. The trained professionals will be able to exert up to date skills as Head Physicians in the Pediatrics or Neonatology Departments, in Nursing Home with Obstetric and Delivery Room Units.
