

Promoting development and psychological well-being in pre-school age: support paths for children, parenting, educational and territorial contexts

Professional outlets: Students will acquire multi-disciplinary skills that allow to operate, as a possible interlocutor and/or consultant, in public and private services, educational agencies (kindergartens) and private social (associations, cooperatives) through the acquisition of practical, as well as theoretical skills focusing on crucial topics proposed by the Course. Moreover, given the multidisciplinary perspective of the Course, necessary in this field, students will acquire knowledge essential for team work and skills that can be spent on specific methods and tools for assessing the child's development, typical and atypical, with the aim of designing and implementing targeted interventions aimed at supporting development itself and/or areas of difficulty.
