

### **Quantitative psychology. Measurement, evaluation, and analysis of psychosocial variables**

Professional outlets: The master aims at training specialists in the measurement of psychosocial variables and in the analysis of the collected data. At the end of the course, professionals will be able to work in organizational, clinical, forensic, social, and marketing contexts. The experts trained in the master will be able to find employment in companies interested in psychosocial evaluation, surveys of attitudes and opinions, or marketing, and also in local or third sector institutions for the activation and management of social projects. Other employment opportunities may be found in social research companies or national and international organizations interested in studying and managing psychosocial variables.
