

Science Communication

Professional outlets: The training includes the use of all communication media: writing, radio, television, web, museums, exhibitions. It is oriented to provide students graduated in different fields with the tools and the cultural maturity to communicate science in an effective, yet rigorous manner, interacting with the researchers. They are also prepared to design e run structures for institutional communication and the production of cultural events devoted to the popularization of science.

The students are prepared to enter the various fields of scientific journalism using all media; they are trained to develop and manage communication programs for research institutions, public and private organizations, health structures, scientific museums and science centers, educational bodies and to help advanced industries to communicate their innovative technologies.
