
TABLE OF ADDITIONAL FUNDING FOR MOBILITY FOR STUDIES PROGRAMMES 2025/26 A.Y.

The total amount of the additional funding (based on income and merit) is calculated for a **maximum period of 10 months**.

Only students regularly enrolled **not "beyond the normal duration of their course of study, increased by one year"** are eligible for additional funding. For the purposes of calculation, the first year of enrolment is taken into consideration, regardless of any changes in the “ordinamento” (year of degree course structure), changes in the degree course (without having withdrawn from studies) or other cases, and the years indicated on Uniweb as "ripetenti" (repeating years) are also counted. Please note that what is shown on the Uniweb is not relevant for the purposes of calculation.

The **down-payment** will be calculated only on the basis of the ISEE statement, while the **balance** will also take merit into consideration (as defined by the regional scholarship ranking).

The income-based down-payment is equal to 50% of the duration of the mobility period indicated in the grant agreement.

If the activities carried out abroad are not recognised and registered on Uniweb **by 31 October 31 2026 for mobilities in the 2025/26 a.y.**, or if the minimum required number of credits is not achieved, the student will be required to return the additional funding already received and will not receive any balance.
