Université de Paris (France)  
Leibniz-Institut für Katalyse (Germany)  
Institut Català de Investigació Química ICIQ (Spain)

**Course Title  
and  
Description**

**Winter School on Physical Organic Chemistry (WISPOC-21)**

The new E- WISPOC is the first school addressed to PhD students, early-stage and established researchers whose highly interdisciplinary and cross-sectoral research is in line with the UN 17 goals of the Agenda 2030.

There will be 4 sessions of frontal lectures: three speakers will give their presentations (two in the morning and one in the afternoon). Each presentation will last more or less 1 hour and there will be half an hour of discussion with the participants.

There will also be group activities aimed at drafting and presentation of competitive projects: there will be an introductory lesson on the foreseen activities and expert tutors will help students in the project draft and in the group activities. Finally, there will be sessions in which participants will present orally and with posters their research.

Awards will be given for the best project and the best oral presentation.

**Period**

30/01/2022 – 04/02/2022

**ETCS credits**
