

TRACCIA 1

1. Le differenze tra catalogo, bibliografia e banca dati
2. Illustri ad uno studente le modalità di ricerca avanzate dell'OPAC
3. Il Dipartimento: funzioni e organi

Please, read and translate aloud:

The ideal archiving policy has three key parts:

- Publications must be deposited in a repository providing unrestricted access free of charge.
- Either the published version or the author's final peer-reviewed version must be deposited.
- Deposition must take place at the time of acceptance for publication.

Καθηγητής

TRACCIA 2

1. Scaffale aperto, scaffale chiuso, scaffale misto: differenze di gestione
2. Illustri ad un utente istituzionale le procedure per consultare da casa le risorse della Biblioteca Digitale
3. In base al Codice di comportamento dei dipendenti pubblici quali sono i doveri da rispettare nelle relazioni con il pubblico?

Please, read and translate aloud:

In a survey for OpenDOAR in early 2006, we discovered that two thirds of Open Access repositories did not have publicly stated policies for the permitted re-use of deposited items or for such things as submission of items, long term preservation, etc. This complicates matters for organizations wishing to provide search services, which in turn reduces the visibility and impact of these repositories

Handy Callegaro
Digitale
Mestre

TRACCIA 3

1. Gestione monografie dall'ordine alla collocazione a scaffale
2. Illustri come aiuterebbe un laureando che cerca informazioni sui programmi per la gestione della bibliografia a sua disposizione
3. Diritto d'autore in biblioteca

Please, read and translate aloud:

The tool produces text and source code that you can copy and paste into your own web pages and files, and of course you can amend it if you wish. However, because we are encouraging repository administrators to use standard policies wherever possible, we respectfully suggest that you avoid making any major changes. Standardizing text will help cross-repository services and others to make the best use of your repository's content.

TRACCIA 4

1. La piattaforma del Sistema Bibliotecario di Ateneo per l'archiviazione a lungo termine di oggetti e collezioni digitali
2. Illustri come al front office svolgerebbe il servizio con uno studente che chiede di prendere in prestito un libro della biblioteca
3. Le Commissioni di Biblioteca e le Commissioni di Polo

Please, read and translate aloud:

Because it is impractical to cover all possible options, we have tended to use generic terms and phrases. There may therefore be places where you wish to be more specific. For instance, one of the 'Types of material' under 'Content policy' is 'Theses and dissertations'. Our host institution, the University of Nottingham, has separate repositories for PhD theses and undergraduate dissertations, so it would be appropriate to edit the generated policy statement accordingly

Claudia Calabrese
dipartimento di
Lettere

TRACCIA 5

1. Possibili sistemi di collocazione dei volumi monografici
2. Illustri ad un laureando quali strumenti offre il Sistema Bibliotecario per valorizzare la sua tesi
3. Il Centro di Ateneo per le Biblioteche

Please, read and translate aloud:

How research data is handled depends on the type of data involved, how that data is created or collected and how the data is to be used now and in future. For example, most data from experiments is reproducible; other data may not be repeatable, such as observations from the field.

Per Tom

TRACCIA 6

1. AIRE-SFX: definizione e funzionalità
2. Illustri come svolgerebbe il servizio al front office della biblioteca Liviano con un docente della sua area che chiede di avere in prestito libri collocati presso la biblioteca di Scienze politiche
3. Gli utenti del Sistema Bibliotecario d'Ateneo

Please, read and translate aloud:

At the lowest level, working reproducibly just means avoiding beginners' mistakes. Keep your project organized, name your files and directories in some informative way, store your data and code at a single backed-up location. Don't spread your data over different servers, laptops and hard drives

Paolo Caberolo
Giacomini
Munson

TRACCIA 7

1. Il sito web delle biblioteche e del Sistema Bibliotecario d'Ateneo: funzioni e strutturazione dei contenuti
2. Illustri come, al front office, aiuterebbe uno studente che cerca un articolo di rivista le cui annate non sono presenti in biblioteca
3. Il Comitato Tecnico Scientifico del Sistema Bibliotecario d'Ateneo

Please, read and translate aloud:

Our experimental collaboration partners were validating a pathway model that we had generated computationally. When writing the paper, however, we hit a crucial roadblock: no matter how hard we tried, we could not reproduce our initial pathway model. Maybe the data had changed, maybe the code was different, or maybe we just couldn't remember the parameter settings of our method correctly.

TRACCIA 8

1. La gestione dei periodici dall'acquisizione alla collocazione a scaffale
2. Illustri ad un laureando le caratteristiche e le modalità di ricerca tipiche di una banca dati disciplinare
3. Il Senato Accademico

Please, read and translate aloud:

First of all, a project is more than a beautiful result. You need to record in detail how you got there. And second, starting to work reproducibly early on will save you time later. We wasted years of our and our collaborators' time by not being able to reproduce our own results. All of this could have been avoided by keeping better track of how the data and analyses evolved over time.

TRACCIA 9

1. Catalogazione semantica
2. Illustri come, al front office, aiuterebbe un utente che chiede di consultare riviste cartacee e riviste elettroniche in biblioteca
3. Il Consiglio d'Amministrazione

Please, read and translate aloud:

Transparency in your analysis makes writing papers much easier. For example, in a dynamic document (Box 1) all results automatically update when the data are changed. You can be confident your numbers, figures and tables are up-to-date. Additionally, transparent analyses are more engaging, more eyes can look over them and it is much easier to spot mistakes

TRACCIA 10

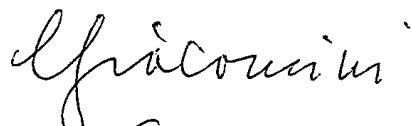

1. Il servizio di Document Delivery
2. Illustri come aiuterebbe al telefono un utente istituzionale che ha la necessità di consultare il full text di un articolo di rivista on line
3. Come si articola il Sistema Bibliotecario dell'Ateneo di Padova?

Please, read and translate aloud:

The recent paper published in Science “Scientific standards. Promoting an open research culture” [6] summarizes eight standards and three levels of reproducibility guidelines. Using tools such as R and knitR (Box 1) will make it likely that you comply easily with the highest-level guideline — and again, that is good for your reputation.

Claudio Callegaro

TRACCIA 11

1. La ricerca delle informazioni in biblioteca: banche dati, portali, motori di ricerca
2. Illustri ad una matricola il servizio fotocopie in biblioteca
3. Il Direttore generale

Please, read and translate aloud:

There are various models for achieving open access. RCUK has a preference for immediate, unrestricted, on-line access to peer-reviewed and published research papers, free of any access charge and with maximum opportunities for re-use. This is commonly referred to as the 'gold' route to Open Access. We are supporting this preference with block grants to eligible research organizations in order to fund the associated article processing charges (APCs).

Min Fin

TRACCIA 12

1. Cataloghi nazionali: Indice SBN e ACNP
2. Illustri come, al front office, aiuterebbe un utente che ha la necessità di consultare il full text di un articolo di rivista on line
3. Il Direttore del Centro di Ateneo per le Biblioteche

Please, read and translate aloud:

Creative Commons Attribution (CC BY) licence is the standard licence used by open access journals, and supports the maximum dissemination and re-use of published papers, whilst protecting the moral rights of authors. It allows others to distribute, remix, manipulate, and build upon a paper, including commercially, as long as they credit the authors for the original paper and do not infringe any copyrights to third-party material included in the paper

Claudio Callegaro

l'fracomin

l'm'm

TRACCIA 13

1. Le possibili cause di deterioramento del materiale librario in biblioteca
2. Illustri ad un laureando le opportunità di indagine bibliografica offerte da un motore di ricerca e da una banca dati multidisciplinare
3. Le funzioni dei direttori tecnici dei Poli e delle Biblioteche centrali

Please, read and translate aloud:

Authors who do not select the gold open access option can post the accepted version of their manuscript to an institutional or subject repository after a 12 month embargo (with reuse restrictions). The accepted version of a paper refers to an author's original version of an article after any changes made during peer review but before any editing, typesetting, etc by the publisher
