Opportunities and limitations

! Extra funding opportunities are not always permitted.

Besides the incompatibilities set by the University Regulations

art. 21.3 <<A scholarship cannot be combined with any other scholarship regardless of the type, except for those awarded by national or non-Italian institutions to supplement the research activities of PhD students with studies abroad >>

note well that some PhD scholarships cannot be combined with the Erasmus mobility grants either.

The Erasmus mobility grant is compatible with the 50% increase to the PhD scholarship (applicable for periods exceeding 15 days)

but

it is not compatible with other European funding schemes and/or **other EU grants** (if you have been assigned one of these scholarships, you can still be able to participate in the programme as Zero Grant participant).

Please also note that the Erasmus+ mobility cannot take place at the same time as other international mobilities, whether physical or virtual.
